Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Alle Semester
Studienjahr/e	2
KP	12
Vorlesungsstunden	84
Laboratoriumsstunden	0
Stunden für individuelles Studium	216
Vorgesehene Sprechzeiten	36
Inhaltsangabe	- Time Value of Money - Risk and Return - Investment Decision Rules

	- Capital Budgeting - Capital Structure - Equity and Debt Financing - Financial system and Financial intermediation - Banks and Non-Banks - Capital Markets and Investment Banks - Asset Management
Themen der Lehrveranstaltung	This module combines two interconnected courses: Principles of Corporate Finance and Financial Markets. The first part (Principles of Corporate Finance) focuses on understanding key financial decisions within companies: Which projects should be pursued? How do we value investments? What financing options are available, and how do capital structure and firm value interact? The goal is to build a solid foundation for analyzing and making financial decisions. ========== The second module (Financial Markets) deals with financial markets, treating in more detail the following topics: Financial markets: The role and importance of financial markets and financial intermediaries; types of financial markets. Banking intermediaries: Bank activities and bank management; bank regulation. Other financial intermediaries: Investment banks, brokers and dealers, venture capital firms, insurance companies, mutual funds, pension funds. Securities exchanged on financial markets: Money market instruments, capital market instruments (stocks and bonds), derivatives (futures, options, swaps). Risk management of financial institutions: Overview of different sources of financial risk with a focus on credit risk, interest rate risk, liquidity risk. Long-term trends in financial markets: Shadow banking and securitization, bank consolidation, digitalization and Fintech, ESG.

Stichwörter	Module one (Principles of Corporate Finance): - Investment analysis - Capital structure - Time value of money - Cost of capital (WACC, CAPM) ========== Module two (Financial Markets): - Financial markets and institutions - Bonds, stocks, derivatives - Financial risk management
Empfohlene Voraussetzungen	Attendance of the course Accounting for Decision Making (1st year) is strongly suggested.
Propädeutische Lehrveranstaltungen	
Unterrichtsform	Module one (Principles of Corporate Finance): Classroom activity will alternate background lectures, applied exercises, examples based on practical short case studies, discussions and comments of current developments and events in financial markets and institutions related to topics covered in class. ==========0 Module two (Financial Markets): The course is developed in 42 hours of lessons of theory complemented by exercises and discussion on real financial markets cases.
Anwesenheitspflicht	Highly recommended, although not compulsory as per national regulation.
Spezifische Bildungsziele und erwartete Lernergebnisse	The course belongs to the type "attività formative affini o integrative". The course is designed to introduce the basic concepts of financial decision-making and financial management, and to demonstrate how these can be applied to real-life cases, with a particular but not exclusive focus on IT projects, digital firms, and technology-

	driven industries. In addition, the functions performed by financial markets and intermediaries within the financial system (e.g., banks) will be discussed as well as recent developments (e.g., token offerings). Students will understand how the interests of owners, debt holders and management of a firm may conflict, and how this influences optimal financing and decision-making. We will also study the factors that influence a firm's capital structure, how these decisions affect investment choices, and how financial markets and intermediaries evaluate and finance business activities. Knowledge and understanding: • D1.17 - Know further methods of Digital Finance and Digital Advertising and their application. • D.1.18 - Understand the interdisciplinary approach to IT projects that takes into account technical foundations, business needs, social and dynamic aspects and the regulatory framework. Applying knowledge and understanding: • D2.3 - Ability to analyse business problems and to develop proposals for solutions with the help of IT tools. • D2.4 - Ability to formalise and to analyse procedures and operational processes, to recognise and use optimisation potentials. • D2.6 - Ability to design, describe and present IT solutions to policy makers. • D2.9 - Ability to support the management of IT departments and software companies by providing information as needed. • D2.11 - Ability to analyse large amounts of data on economic facts and processes. • D2.13 - Ability to apply additional knowledge in the subjects of Digital Finance and Digital Marketing. • D2.18 - Know how to communicate with the client in written and oral form on a professional level in English, Italian and German. Making judgments • D3.1 - Ability to collect and interpret data useful for forming independent judgments on IT and economic aspects of information systems.

	• D3.3 - Ability to compare and evaluate different IT solutions based on their technical characteristics and key business figures. • D3.4 - Ability to assess fundamental economic and business facts on the basis of numerical data. Communication skills • D4.1 - Be able to use the three languages English, Italian and German and, in particular in English, be able to use appropriate technical terminology and communication style. • D4.2 - Ability to use modern means of communication also for remote interactions. • D4.3 - Ability to negotiate with people with different professional experiences the definition and requirements of corporate information systems. Learning skills • D5.2 - Learning ability to carry out strategic and IT project activities in corporate communities, also distributed. • D5.3 - Ability to follow rapid technological developments and to learn about innovative aspects of the latest generation of information technology and systems.
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	Module one (Principles of Corporate Finance): Attending students: Group work (30%) and final exam (70%); Non attending students: Open question (30%) and final exam (70%). ========== Module two (Financial Markets): Written exam for attending and non-attending students with theoretical review questions, multiple choice questions, and numerical exercises.
Bewertungskriterien	Module one (Principles of Corporate Finance): Attending students: Group work (30%) and final exam (70%); Non attending students: Open question (30%) and final exam (70%). ========== Module two (Financial Markets):

	Theoretical knowledge of the concepts covered in class and ability to solve financial problems.
Pflichtliteratur	Module one (Principles of Corporate Finance): J. Berk and P. DeMarzo, Corporate Finance, 6th Edition, Pearson.(English) ========== Module two (Financial Markets): Z. Bodie, A. Kane, A.J. Marcus, and N. M. Racculia, Investments, 14th edition, 2026, McGraw-Hill (Students can refer also to past editions of the English textbook) F.S. Mishkin, S.G. Eakins, “Financial Markets and Institutions”, 10th edition, 2023, Pearson (Students can refer also to past editions of the English textbook or to the Italian version of the textbook titled "Istituzioni e mercati finanziari") A. Saunders, M. Cornett and O. Erhemjamts, Financial Markets and Institutions, 9th edition, 2024, McGraw-Hill (Students can refer also to past editions of the English textbook or to the Italian version of the textbook titled "Economia degli intermediari finanziari")
