Sintesi contenuti	The course refers to the typical educational activities and belongs to the scientific area of Economics. The course is designed to give a general overview of scientific knowledge in tourism as part of the economy and destination development. In addition, it allows to develop specific competences, including the ability to study the impact of regional governance on destination development. At the end of the course, students are expected to understand the key drivers behind tourism and destination development and to draft a strategy (with tools such as an appropriate SWOT analysis) to

	increase the attractiveness of a destination or of a region to stimulate the regional tourism economy.
Argomenti dell'insegnamento	The course starts with basic microeconomics, markets, market structure, game-theoretic prerequisites and strategic pricing, product differentiation and quality. A next topic is network economics and network demand, as well as multi-sided platforms and their impact on tourism. These topics will be covered together with case studies, with an eye on platform strategies and the regulation of platforms. Effects of e-commerce are being covered, monopolistic pricing, dynamic pricing, dual pricing and price discrimination. Tourism and sustainability will be covered with an eye on the regional context, including case studies.
Parole chiave	Competition, networks, platform strategies, sustainability.
Prerequisiti	Knowledge of microeconomics and basic knowledge of industrial economics
