## Course Description

Course Title	Responsible and transformative decision making
Course Code	27272
Course Title Additional	
Scientific-Disciplinary Sector	SECS-P/08
Language	German
Degree Course	Bachelor in Economics, Politics and Ethics
Other Degree Courses (Loaned)	
Lecturers	Dr. phil. Ralf Lüfter, RLuefter@unibz.it https://www.unibz.it/en/faculties/economics- management/academic-staff/person/11838 Dr. Sören Eberhard Schuster, SoerenEberhard.Schuster@unibz.it https://www.unibz.it/en/faculties/economics- management/academic-staff/person/42439
Teaching Assistant	
Semester	First semester
Course Year/s	3
СР	7
Teaching Hours	42
Lab Hours	6
Individual Study Hours	-
Planned Office Hours	21
Contents Summary	The course is an exercise in critical thinking. Thinking is critical when it is able to question the conditions of what is decisive and thus forms the basis of judgments and actions. On the basis of a philosophical diagnosis of the present, the elements that enable responsible decision making with regard to social, political, scientific and economic transformation processes should come to light. Examining these elements reveals sense-structures and

	widens the scope of decision making processes beyond the limits of usual positions. The exercise in critical thinking is completed by questioning the ethical implications of decision making processes.
Course Topics	° Diagnosis of the present era in light of classical positions of philosophy
	° Between the present future and the future present: How does "the new" come into the world?
	° The paradox of the future
	° On the constitution of transformative knowledge
	° Uncertainty and risk as elements of transformative knowledge
	° From transformative knowledge to responsible decision-making
	° Relata of responsibility
	° Systemic and ethical responsibility
	° Fundamentals of decision-making
	° Measure, measuring, excess (lack of measure): horizons of decision-making
	° Crisis, criterion, critique: moments of decision-making
	° What does responsible and transformative decision-making mean? What requires responsible and transformative decisions?
Keywords	Transformative knowledge; individual and social responsibility; formal structure of decision-processes; choosing and deciding; ethical principles of decision-making: the question of future-fit (sustainable) knowledge and the future paradox.
Recommended Prerequisites	
Propaedeutic Courses	None
Teaching Format	Front-of-class and seminar style teaching. Students are required to prepare readings and are encouraged to participate in class discussions. — Supplementary exercises will address central topics

	and key concepts from the course.
Mandatory Attendance	Attendance Highly recommended but not mandatory
Specific Educational	Knowledge and understanding:
Objectives and Learning	At the end of their studies, students will have acquired the
Outcomes	following knowledge and skills:
	- diachronic textual knowledge and hermeneutic tools for
	understanding the phenomenon of human existence in the context
	of the establishment of the polis;
	- diachronic textual knowledge and instruments of epistemological
	analysis for understanding the relationship between philosophical
	and scientific knowledge, with particular emphasis on the ethical
	foundations of economics and the prerequisites and implications of
	economic modelling;
	- knowledge of selected basic philosophical positions and
	theoretical analytical tools for developing the autonomous ability to
	conceptualise and make ethical-philosophical diagnoses of
	phenomena;
	- knowledge of selected basic philosophical positions and
	theoretical analytical tools for understanding the fundamental institutions of the Western world;
	- knowledge of the relationship between nature and society based
	on fundamental concepts of the philosophical tradition, enabling an
	analysis of the human habitat and an understanding of the crises
	associated with the technologisation of nature in an economic
	context;
	- Knowledge of the philosophical reasons for decision-making
	criteria in the field of economics and their ethical implications, with
	the aim of understanding the element of responsibility that these
	reasons entail on both a theoretical and practical level.
	Applying knowledge and understanding:
	- the ability to detach oneself from the operational, contingent
	level and the corresponding forms of knowledge in order to engage
	with the realm in which meaning and the knowledge based on it
	are constituted;
	- the ability to distinguish between the factual cause of a situation
	and the origin or principle of a phenomenon;
	- the ability to understand the linguistic dimension and the
	differences between languages as an area of elaboration of

	philosophical thought; - the ability to adopt an autonomous cognitive and critical attitude, supported by an adequate capacity for conceptualisation at the
	methodological, theoretical and ethical levels.
	Making judgements Acquiring the necessary judgement and methodological tools for
	the critical analysis of data, sources, assumptions and implications of scientific practice, as well as the political, ethical and legal
	contexts in which economic phenomena are embedded and with
	which they interact.
	Communication skills
	Proficiency in written and spoken Italian, German and English, including the translation of these languages. Intercultural
	competence. Conceptual conciseness, ability to capture facts in
	writing, especially for scientific and science-based texts.
	Learning skills
	Promotion of critical thinking and analytical skills to recognise complex problems in their long-term dynamics and in the diversity
	of their - also ethical - implications.
Specific Educational Objectives and Learning	
Outcomes (additional info.)	
Assessment	Final exam at the end of the term that consists of open questions
	to assess knowledge and understanding. Exam preparation should be based on the topics covered and the readings discussed in
	class.
	In addition to that, each student is expected to present and to
	submit an essay. The topic has to be established in accordance
Evaluation Criteria	with the lecturer.  The written exam counts for 70%, the presentation and written
Evaluation Citeria	version of the essay for 30% of the final mark
	Relevant for the assessment:
	<ul><li>knowledge and understanding</li><li>ability to ask adequate questions</li></ul>
	a.s

	<ul><li>critical thinking</li><li>analytical strength</li></ul>
Required Readings	Copies of all text passages relevant to the exam will be made available during the semester.
Supplementary Readings
