

Syllabus

Descrizione corso

Titolo insegnamento	Research Methods and Technology Transfer
Codice insegnamento	76062
Titolo aggiuntivo	
Settore Scientifico-Disciplinare	INFO-01/A
Lingua	Inglese
Corso di Studio	Corso di laurea magistrale in Ingegneria del Software
Altri Corsi di Studio (mutuati)	
Docenti	prof. Ilenia Fronza, Ilenia.Fronza@unibz.it https://www.unibz.it/en/faculties/engineering/academic-staff/person/17458
Assistente	
Semestre	Primo semestre
Anno/i di corso	2
CFU	6
Ore didattica frontale	40
Ore di laboratorio	20
Ore di studio individuale	90
Ore di ricevimento previste	18
Sintesi contenuti	<ul style="list-style-type: none"> • Quantitative, qualitative, and mixed-method research • Systematic literature review, Systematic mapping study • Survey research • Experimental research • Case study • Technology transfer
Argomenti dell'insegnamento	The course addresses key challenges in scientific research and equips students with effective methods for conducting and reporting research.

Parole chiave	Research methods, Reporting research.
Prerequisiti	
Insegnamenti propedeutici	
Modalità di insegnamento	Frontal lectures, hands-on activity, and discussion.
Obbligo di frequenza	Not compulsory but strongly recommended for the lab hours.
Obiettivi formativi specifici e risultati di apprendimento attesi	<p>Knowledge and understanding</p> <p>D1.2 be able to analyse and solve even complex problems in the area of Software Engineering with particular emphasis on the use of empirical evaluation studies, methods, techniques, and technologies.</p> <p>D1.7 know the various fields of application of Software Engineering also with reference to the local, national, and international economic-social context.</p> <p>D1.8 ability to read, understand, and elaborate on specialist scientific documentation, such as conference proceedings, articles in scientific journals, technical manuals.</p> <p>Applying knowledge and understanding</p> <p>D2.2 know how to design and carry out empirical studies of software systems in order to acquire measurements of their behaviour and evaluate experimental hypotheses in different application fields, such as business, industry, education, or research.</p> <p>Making judgements</p> <p>D3.1 ability to independently select documentation from various sources, including technical books, digital libraries, technical scientific journals, web portals, or open source software and hardware tools.</p> <p>D3.5 ability to work with broad autonomy, taking responsibility for projects and structures.</p> <p>Communication skills</p> <p>D4.1 ability to present the contents of a scientific/technical report in a set time in front of diverse audiences, including non-specialists.</p> <p>Learning skills</p> <p>D5.1 ability to independently extend the knowledge acquired</p>

	during the course of study by reading and understanding scientific and technical documentation in English.
Obiettivi formativi specifici e risultati di apprendimento attesi (ulteriori info.)	
Modalità di esame	<p>Attending students</p> <p>Project work [70% of mark] + final exam (oral) [30% of mark]. Project work is needed to assess ILOs D1.2, D1.8, D2.2, D3.1, and D3.5.</p> <p>The oral exam is needed to assess ILOs D1.7, D1.8, D2.2, D4.1, and D5.1.</p> <p>Project work and final exam are mandatory, and both must be positive to pass the exam. In case of a positive mark for the project work, the mark will count for the remaining regular exam sessions. In case of negative evaluation of the project work, a new project needs to be submitted for the next session. Project work must be evaluated BEFORE the final exam, otherwise the exam cannot be registered.</p> <p>To be classified as an "attending student," students must attend at least 75% of the lab hours.</p> <p>Non-attending students</p> <p>Final exam (oral) [100% of mark]. Verification questions and discussion about the topics of the course. ILOs assessed: all.</p>
Criteria di valutazione	<p>Relevant for the final exam assessment: correctness of answers, clarity of answers, ability to summarize, and deep understanding of the course topics.</p> <p>Relevant for the project work assessment: skills in critical thinking, identification of interesting research questions, correct application of the research methods, effectiveness in the results, and quality of the final report.</p>
