Kursbeschreibung

Titel der Lehrveranstaltung	Interior Architecture and Temporary Installations
Code der Lehrveranstaltung	56007
Zusätzlicher Titel der Lehrveranstaltung	
Wissenschaftlich-disziplinärer Bereich	CEAR-09/C
Sprache	Italienisch
Studiengang	Weiterbildender Master (Aufbaustufe) "EDENSPACES - Gestaltung von Lernlandschaften zwischen Pädagogik, Architektur, Design und Natur"
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	dr. Bruna Sigillo, Bruna.Sigillo@unibz.it https://www.unibz.it/en/faculties/education/academic-staff/person/45727
Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Alle Semester
Studienjahr/e	-
KP	3
Vorlesungsstunden	18
Laboratoriumsstunden	0
Stunden für individuelles Studium	57
Vorgesehene Sprechzeiten	0
Inhaltsangabe	Waiting for teacher info
Themen der Lehrveranstaltung	The "Interior Architecture" course aims to provide the basic tools for understanding the meanings of architectural interiors, aiming to develop the critical capacity and sensitivity necessary to

	understand the generative role of the Interior in architectural dynamics. The lessons will be structured around the following themes: 1 Interiority, internality, poetics. Definition of the discipline of Interior Architecture. Humans at the center of the project (anthropometry, proxemics, sensoriality). Hermeneutic circularity in the design phases. 2 Interiority, internality, pedagogy in learning spaces. 3 ENCLOSURE MARGIN INFRARED. Archetypes of the limit. Spatial themes: Interior/Exterior; Form of the enclosure and its content. 4 ACCESSING ENTERING WELCOMING. Access; The threshold. 5 PATHS. Crossing space. Perception through the senses: visual and tactile experience. Being in space: appropriation and contemplation. 6 ENVIRONMENT SCOPE. Object/phenomenon relationship. Components of the scope: the role of furnishings in defining space (total integration/movable systems) Workshop activities: Case study analysis sheets The course aims to develop: - an awareness of the reciprocal hermeneutic relationship between the interior, the furnishings, and the entire architectural complex of a building, including the relationship between artificial and natural space. - the ability to understand the connections between formal constructions and the possible declinations of living, - the ability to adapt a space, whether public or private, to the human scale, both physical and cultural, - the ability to understand the spatial role of even non-permanent and fixed elements within architectural space, whether small or large.
Stichwörter	Small-scale architectural design, spatial phenomenology, educational space, project scales, hermeneutic circularity of the compositional process, architecture as a cultural device, project curation, educational landscapes, architecture and pedagogy.

Empfohlene Voraussetzungen	Familiarity with the basic concepts of space, form, and function in architecture. No specific technical skills are required.
Propädeutische Lehrveranstaltungen	
Unterrichtsform	The course is taught in blended mode: - Online dialogical lessons with presentations and analysis of case studies - In-person discussions and discussions during the school sessions
Anwesenheitspflicht	See master's regulations.
Spezifische Bildungsziele und erwartete Lernergebnisse	Waiting for teacher info
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	The course also aims to develop: - an awareness of the reciprocal hermeneutic relationship between the interior, the furnishings, and the entire architectural complex of a building, including the relationship between artificial and natural spaces. - the ability to understand the connections between formal constructions and the possible declinations of living. - the ability to adapt both public and private spaces to human scale, both physical and cultural. - the ability to understand the spatial role of even non-permanent and fixed elements within architectural space, whether small or large.
Art der Prüfung	Written report (maximum 10,000 characters) applying the principles explored in the course to the thesis project under development, or analysis of a case study relevant to your project.
Bewertungskriterien	Theoretical understanding (40%) Mastery of the course's key concepts: principles of small-scale architectural design, design method, and phenomenological dimension Analytical ability (40%) Quality of critical analysis of the chosen case study, ability to identify and discuss design choices, coherent argumentation, and appropriate use of architectural language Reflexivity and originality (20%)

	Ability to connect the course content with one's professional field, originality of perspective, and depth of reflection on the relationship between architecture and pedagogy
