Inhaltsangabe	This course introduces the fundamentals of financial accounting, enabling students to prepare and interpret financial statements, assess a

	<p>company's performance, and use accounting data for basic management decisions. It also offers an initial overview of corporate non-financial reporting, including sustainability and ESG disclosures</p>
<p>Themen der Lehrveranstaltung</p>	<p>This course provides an introduction to the principles and practices of financial accounting. Students learn how to record business transactions in accordance with the double-entry system, apply the adjusting and closing process to ensure accurate period-end reporting, and account for the main components of financial statements.</p> <p>These include merchandising operations and inventory valuation methods, cash management and internal controls, recognition and measurement of receivables, acquisition and depreciation of fixed assets, treatment of current and long-term liabilities, equity transactions such as dividends and share issues, as well as the accounting for basic investments.</p> <p>The course also covers the preparation and interpretation of financial statements, including the statement of cash flows, and introduces basic tools for financial statement analysis.</p> <p>In addition, students gain initial exposure to sustainability accounting and ESG reporting concepts, linking financial and non-financial information in corporate reporting.</p>
<p>Stichwörter</p>	<p>Accounting, Financial reporting, Financial statements, Income statement / Profit and loss, Double-entry bookkeeping, Company performance, Sustainability reporting</p>
<p>Empfohlene Voraussetzungen</p>	<p>There are no prerequisites. This course is for first-year students.</p>
<p>Propädeutische Lehrveranstaltungen</p>	
<p>Unterrichtsform</p>	<p>This course is structured in Lectures and Tutorials.</p> <p>During the Lectures the learning objectives are approached from a conceptual point of view. The important matters of each topic are explained and discussed. Students are expected to familiarize with the literature related with the related Lecture. The Lectures will combine in-class explanation of the background material, problem-solving and case discussions.</p> <p>The Tutorials (Lab Hours) focus on developing skills to solve</p>

	<p>financial accounting exercises. The problem-solving competence of the students is stimulated and trained through working out numerical applications. Students are suggested to have read the assigned problems in advance and attempted to work out the solution before coming to a Tutorial. This allows for a more efficient use of class time to cover only the more complex issues and to apply the theoretical concepts to realistic situations.</p> <p>Both Lectures and Tutorials will be video-recorded to allow students to review the material at their own pace, catch up on missed sessions, and reinforce their understanding of key concepts.</p>
