Inhaltsangabe	This course gives a general overview of labor economics. It discusses both theoretical and empirical evidence on core topics including labor supply, labor demand, labor market equilibrium, unemployment and human capital. It also discusses the role of labor unions, incentive pay contracts, labor market discrimination in determining labor market outcomes. We also discuss theoretical and empirical evidence about social interactions, inequality, labor

	mobility, immigration, household decision-making and child development. Students will learn how to interpret theoretical ideas and applied research results such as how individual labor market decisions are impacted by government policies.
