Ressum� di contegnus	This basic Project Management course introduces the fundamental concepts, tools, and techniques used to manage projects effectively. Participants will learn how to define project objectives, plan activities, manage time and resources, and monitor progress. The course is designed to provide a practical overview that helps beginners understand how projects are structured and how successful project outcomes can be achieved. By the end of the course, learners will have a clear understanding of the project lifecycle and the key responsibilities of a project manager, forming a solid foundation for further study or practical application in real-world projects.
