Kursbeschreibung

Titel der Lehrveranstaltung	Pädagogik und Didaktik der Bewegung 1 - Grundlagen
Code der Lehrveranstaltung	11412
Zusätzlicher Titel der Lehrveranstaltung	
Wissenschaftlich-disziplinärer Bereich	MEDF-01/A
Sprache	Italienisch
Studiengang	Einstufiger Master in Bildungswissenschaften für den Primarbereich - Abteilung in italienischer Sprache
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	Prof. Attilio Carraro, Attilio.Carraro@unibz.it https://www.unibz.it/en/faculties/education/academic-staff/person/42261 dr. Antonino Mulè, Antonino.Mule@unibz.it https://www.unibz.it/en/faculties/education/academic-staff/person/49606
Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Zweites Semester
Studienjahr/e	2
KP	5
Vorlesungsstunden	30
Laboratoriumsstunden	20
Stunden für individuelles Studium	75
Vorgesehene Sprechzeiten	15
Inhaltsangabe	The importance of movement and play in a child's development is analysed in relation to the educational objectives of pre-school and

	primary school.
Themen der Lehrveranstaltung	Physical activity, health, and well-being: the basic foundations; quality physical education: the founding principles; physical literacy; motor behavior, motor skills, motor competencies; the teaching of motor activities and the teaching styles.
Stichwörter	Physical education Physical activity Physical literacy Wellbeing Health
Empfohlene Voraussetzungen	Knowledge of general teaching methods, developmental psychology, and basic human physiology. Knowledge of physical education teaching methods received in secondary schools. Willingness to actively participate in the situations proposed during the course and workshops. Desire to play
Propädeutische Lehrveranstaltungen	
Unterrichtsform	The course is held in theoretical and practical form through classroom discussion (lectures) and the participation and critical discussion of motor experiences and situations in the gym and other spaces for movement (laboratory).
Anwesenheitspflicht	In accordance with the regulation
Spezifische Bildungsziele und erwartete Lernergebnisse	By combining the study of the fundamentals of motor science and educational theories with reflection on their own motor experience, students will develop the following competences - recognising and meeting children's movement-related needs - proposing different modes of motor learning and adapting them appropriately to different situations and contexts; - knowing how to design, conduct and evaluate stimulating and problem-posing learning situations for different age groups. Specific disciplinary theoretical content is covered in the module and activities are offered for the development of professional skills. Knowledge and understanding To know the importance and function of movement in childhood,

	to master basic notions of motor development and learning. Ability to apply knowledge and understanding To be able to choose appropriate materials and content for the promotion of motor activities in pre-school. Autonomy of judgement To be able to observe, analyse and evaluate children's movement. Communication skills To know the specific language of motor education, to be able to discuss movement in technical/scientific contexts during motor education lessons with children and their parents. Learning skills To acquire teaching strategies, to be able to reflect on them in order to design and implement effective teaching activities.
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	//
Art der Prüfung	Written production and oral discussion of an activity portfolio; oral examination on course and workshop content.
Bewertungskriterien	Awarding of a single final grade (course and laboratory). Criteria for awarding the grade. The following are assessed: commitment, active participation, ability to collaborate, creative capacity and originality, ability to critically re-elaborate, argumentative pertinence, relevance of the topics dealt with, clarity of the answer, mastery of the specific disciplinary language, property of language (also in relation to the language of the course), ability to synthesise. In the case of a negative mark for the entire module, any partial examinations taken with a positive result will be considered as already passed in the subsequent attempt to take the entire Module examination. It should be noted that, even in this case, a negative mark for the entire module will be counted towards the number of attempts available to take an examination. According to the Examinations Regulations, if a student fails an examination in

	three consecutive attempts, he/she may not register for the same examination in the three sessions following the last attempt (Art. 6, para. 4 of the current Regulations for Proficiency Examinations).
Pflichtliteratur	National and Provincial Indications for the Curriculum of the Infancy School and the First Cycle of Education. Abate Daga, F., Agosti, V., Albergoni, A., Bellafigliore, M., Bertollo, M., Biino, V., Bonavolontà, V., Carraro, A., et al. <i>L'educazione fisica in Italia: scenari, sfide, prospettive. Documento di consenso del Gruppo di Studio "Educazione Fisica & Pedagogia dello Sport" della SISMeS (Società Italiana delle Scienze Motorie e Sportive)</i>.
