Ressumè di contegnus	The module imparts basic historical and geographical knowledge and skills relating to the different historical periods and the characteristics of landscapes and regions as well as the socio-cultural, economic and political systems that define their organisation, relationships, transformation processes and identity. The didactic realisation of the acquired knowledge takes place with special consideration of the age group 5-12 years.
Argomenc dl curs	See the individual course modules.
Paroles clef	Historical and geographical knowledge Historical periods Regional focus: South Tyrol, the Alps, Italy, the world Socio-cultural, economic and political systems
Prerequisic aconsiés	
Cursc propedeutics	
Modalité de ensegnament	Lectures and LAB
Oblianza de frecuencia	In accordance with the regulation
Obietifs formatifs y competenzes da arjonje	The educational objectives of the module are: - Basic knowledge and basic competences which, in the subject area of history, include general specialist knowledge of local, regional and world history as well as methodological and didactic skills for the individual promotion of historical awareness in children aged 5 to 12 years. - Basic knowledge and basic competences in the subject area of geography, which include specialist knowledge of general

	geography and local history as well as methodological and didactic skills to promote geographical awareness in children of the respective age group. - Acquisition of basic historical and geographical knowledge and skills in relation to different historical periods and the characteristics of landscapes and regions as well as the socio-cultural, economic and political systems that define their organisation, relationships, transformation processes and identity. Expected learning outcomes and competences: Knowledge and understanding Insight into the different historical periods and into the main features and characteristics of general and regional geography. Application of knowledge and understanding Planning, creating and implementing teaching units and series of lessons in which the historical and geographical awareness of the learners is awakened and promoted. Judgement Forming factual and value judgements when developing and interpreting historical accounts and sources as well as geographical phenomena and processes. Communication Presentation, discussion and evaluation of the content and teaching units developed in the laboratories. Learning strategies Creating different structures that enable learners to make progress.
Obietifs formatifs y competenzes da arjonje (informazions suplementares)	
Sort de ejam	The module examination, which consists of four partial examinations, is written, whereby this takes the form of written examinations in the lectures and asynchronous written

	examinations in the laboratories (e.g. academic term paper or lesson analysis). While the written examinations for the lectures are primarily concerned with questions of knowledge and transfer, the asynchronous written examinations for the laboratories include reflection and processing of the practical experience gained in the courses in history and geography as academic disciplines and their didactic implementation. In the module examination, the module parts are examined individually. In the event of a negative assessment of the overall module, any positively assessed module parts will be credited the next time you take the module examination. Please note, however, that a negative assessment will also be included in the count of examination attempts in this case. According to the examination regulations, three attempts without passing will result in a block for three examination dates. (see also Article 6, Paragraph 4 of the current examination regulations).
Criters de valutazion	The overall assessment for the module is determined on the basis of the performance in the four partial examinations. The weighting of the individual assessments corresponds to the proportion of credit points for each individual course in the overall module. In accordance with the examination regulations of the faculty, the assessment for each individual course belonging to the module must also be positive for a positive overall assessment of the module performance. If individual partial examinations are assessed negatively, only those partial examinations that were assessed negatively must be repeated. Criteria for assigning grades: - Correctness and clarity of answers, correct command of language, ability to synthesise, judgement and ability to make references to the topics covered. - Ability to collaborate, creativity, critical thinking and synthesis.
Bibliografia obligatora	Please refer to the information provided for each individual component of the module.
