Teaching Hours	66
Lab Hours	50
Individual Study Hours	134
Planned Office Hours	30
Contents Summary	Core area: Music and art education. Related areas: Art history, music history, art studies, musicology, anthropology, media. Areas of influence: Natural sciences, literary studies, communication studies, social sciences.
Course Topics	See the individual course modules
Keywords	Practical Artistic Performance Didactic Reflection Rhythmic and Vocal Skills
	Theoretical Knowledge in Music and Art
Recommended Prerequisites	
Propaedeutic Courses	
Teaching Format	Lectures Laboratory activities
Mandatory Attendance	In accordance with the regulation
Specific Educational Objectives and Learning Outcomes	The students - know the methodological and theoretical foundations of art education and music education; - are able to express themselves verbally and non-verbally in relation to aesthetic content; - are able to realise statements, ideas, wishes and conceptions with creative and musical means; - learn to develop ideas for aesthetic projects and to plan them appropriately; - learn to plan, carry out and reflect on aesthetically orientated educational activities.
	Expected learning outcomes and competences: Knowledge and understanding

The students

- have basic technical knowledge, know elementary and ageappropriate technical terms and use them correctly;
- know the basic didactic concepts of music and art education for music and art education in the primary sector, especially in early childhood education and kindergarten.

Applying knowledge and understanding

The students

- are able to systematise and reflect on their own musical and creative experiences and incorporate them into the planning, implementation and reflection of didactic units, especially for kindergarten;
- are able to transfer the acquired knowledge to practical contexts in a reflected and situation-adapted manner.

Judgement

The students

- evaluate their own creative and musical work and that of children appropriately;
- are able to assess the quality and applicability of didactic publications for music education and art education practice;
- demonstrate the ability to think across disciplines in the context of musical and aesthetic education, which is expressed in an independent judgement.

Communication

The students

- have a basic repertoire of subject-specific terms for precise and appropriate communication;
- are able to take part in specialised discussions.

Learning strategies

The students

- convey orientations to children that enable them to set themselves a creative task;
- develop their own learning strategies by changing symbol systems, formats, techniques and genres as well as taking a critical look at aesthetic conventions.

Specific Educational

Objectives and Learning Outcomes (additional info.)	
Assessment	Final module examination
	with the following partial examinations:
	Partial examination in music:
	a. Written module examination on the topics covered in the lecture and the compulsory literature for music.
	b. Practical oral module examination on the topics covered in the
	laboratories and lecture.
	- Performance of a self-invented eight-bar rhythmic exercise (4/4 time) to a suitable accompanying piece. The use of movement and/or body instruments must be demonstrated (as a didactic aid). - Presentation of a part/excerpt from the practical part of the musical activity presented in the laboratory (e.g. the rhythm, the body percussion or the song) with a brief explanation of the didactic considerations involved. The assessment of the written presentation of the musical activity in the laboratory is also included in the assessment of this part of the examination. - In the examination discussion, some questions about the content of the lectures and the compulsory literature may arise - in particular, an understanding that goes beyond factual knowledge is important. - Memorised, preferably expressive performance of one of the 7 exam-relevant songs (with or without accompaniment, self-
	accompaniment and depending on the requirements of the song).
	Partial examination Art:
	Lecture:
	Written module examination on the topics covered in the lecture for Art.
	Oral examination:
	The assessment of the practical presentation and the written
	presentation of the artistic activity in the laboratory are also
	included in the grading of this part of the examination.
Evaluation Criteria	Assignment of a single final assessment for the module as a whole.
	The assessment is based on the topics covered,
	expected learning outcomes and the specific educational

	objectives.
	Criteria for assessment are: Appropriate answers, logical structure, clear argumentation, reference to specialist literature, ability to critically analyse and reflect, use of academic terminology, independent and reasoned judgement as well as quality of subject-specific presentation and musical or artistic performance and delivery. For a positive assessment of the overall module, all sub-courses must be assessed positively in accordance with the examination regulations.
	In the event of a negative assessment of the overall module, any positively assessed parts of the module will be credited the next time you take the module examination. Please note, however, that a negative assessment will also be included in the count of examination attempts in this case. According to the examination regulations, three attempts without passing will result in a block for three examination dates. (see also Article 6, Paragraph 4 of the current examination regulations).

Individual Study Hours	20
Planned Office Hours	6
Contents Summary	In the laboratory, the topics of the lecture are deepened and tested in practice. Combined with practical exercises and active participation by the students, the course has the following objectives: - Planning and implementation of didactic units with diverse musical activities in compliance with the state's framework guidelines in the musical field for age groups 2-7; - Application and realisation of music theory knowledge and tasks of listening and perception training; - (Further) development of singing skills and realisation of tasks for song composition, song accompaniment and song mediation; - Creative use of body instruments and acquisition of basic singing and instrumental music-making skills; - Familiarisation with and performance of voice and sound games suitable for the 2-7 age group and mastery of basic playing techniques on various Orff instruments (rhythm instruments and mallet instruments); - Applying a variety of methods when carrying out practical music activities. - Development of skills to present musical activities in the role of a leader.
Course Topics	 Vocal forms: Rhymes, verses, spoken canons and chants, children's songs, simple song accompaniments; Care and development of the voice: speech and voice training, children's voice training;

	- Development of the personal singing voice, intonation, voice
	leading, expression;
	- Music theory: forms of notation (traditional notation, forms of
	graphic notation), rhythm syllables and solmisation syllables,
	simple principles of form;
	- Ear training: Perception and listening training, especially rhythmic
	patterns.
	- Introduction to creative instrumental music-making and
	improvisation; body instruments;
	- Vocal and instrumental sound games; basic playing techniques on
	Orff instruments (mallet instruments and rhythm instruments);
	familiarisation with other melodic and chordal instruments;
	- Basics of leading singing and music groups;
	- Music and movement: Basic aspects and selected examples of
	combining music and movement;
	- Planning of musical activities and realisation of parts with the
	laboratory group in accordance with the state's framework
	guidelines in the musical field for age groups 2-7.
Teaching Format	Practical music activities are at the centre of the laboratory; in
	connection with this, creative and cooperative forms of learning as
	well as performative elements are used.

Contents Summary	The lecture focusses on theoretical and practical aspects of art education, in particular its methodological and theoretical foundations. It also deals with art and art education as a central element of comprehensive aesthetic education and its scientific foundations. Elementary parameters of creative forces that are relevant to creative educational activities are presented. These are to be tested theoretically and practically in such a way that a transfer to and from the students' specialised didactic experiences is possible.
Course Topics	 Physiology and psychology of aesthetic perception as a principle of aesthetic education; Art as a medium of play, representation and creative design; Art and image as a universal language The digital image, online databases

	- Symbol systems and art theory (iconography/iconology)
	- Fundamentals of aesthetic research;
Teaching Format	Lecture, demonstration, illustration. Discussion of case studies
Required Readings	Kunst:.

Individual Study Hours	30
Planned Office Hours	6
Contents Summary	The aim of the laboratory is to deepen and practically test the topics of the lecture. Theoretical and practical aspects of art education and didactics are taught, particularly with regard to early childhood education up to the transition to primary school and looking ahead to late childhood. This also involves art and art education as a central element of comprehensive aesthetic education and upbringing.
Course Topics	The laboratory takes up topics from the lecture and expands on them in theoretical, methodological, didactic and practice-orientated terms, particularly in relation to the age range up to around the age of seven and to kindergarten, e.g: - The image of the world in the child's world of images: aesthetic perception and pictorial design in early childhood; - Basic features and didactics of children's drawing and painting - Art as a medium for organising aesthetic processes; performative and dramaturgical design in kindergarten; - Perceiving, reading and understanding pictorial representations; - material and craft experiences with regard to early aesthetic education and upbringing.
Teaching Format	The laboratory offers space for project activities, has a workshop character and utilises creative and cooperative forms of learning as well as performative elements, e.g. acting, film-making, presentation and discussion of work results.
Required Readings	Kirchner, C. (2008). Kinder & Kunst. Was Erwachsene wissen sollten. Seelze-Velber.
