Sintesi contenuti	The course provides students with tools for an advanced understanding and development of skills in the field of representation. Specific focus is on the narrative character of image composition.
Argomenti dell'insegnamento	This course focuses on drawing as an essential technique for conceptualizing, communicating, and expressing artistic ideas. It builds on a previous one-year course in which students were introduced to the basics of drawing: idea, proportion, composition, and perspective. This course provides students with techniques to

	<p>further develop their drawing skills and to achieve a deeper understanding of the act of drawing. It aims to sharpen observational skills and strengthen individual artistic vocabularies.</p> <p>One of the key features of this module is its focus on narrative connections. Through the use of a variety of drawing techniques, students are encouraged to visualize individual observations within a broader context.</p> <p>The course is open to students of all academic years. Didactic materials take the trilingual context of the faculty into account.</p>
