- provide specific tools to improve concentration, memory and learning

#### Disciplinary skills

Identify the educational and pedagogical value in the yoga methodologies learnt as a tool for healthy growth, learning and autonomy.

#### Knowledge and understanding:

Knowledge of basic yoga methodologies and their application in education.

#### Ability to apply knowledge and understanding:

With theoretical explanations and practical exercises develop the students' ability to apply yoga methodologies in various educational settings also to solve situations of discomfort and learning difficulties and to promote autonomy and socialisation in children.

#### Autonomy of judgement

Developing the ability to listen to oneself, self-awareness and self-assessment

Yoga methodologies are based on listening to and evaluating oneself and one's personally perceived and assessed experiences and thus foster the attitude of self-management and not depending solely on external judgements.

This aptitude is consolidated and becomes the capacity for

	<p>autonomous evaluation and judgement in every sphere: cognitive, psychological, social, relational and ethical.</p> <p>Communication skills Being able to explain the usefulness, purposes and methodologies of the discipline yoga in different educational contexts in pre-school and primary school.</p> <p>Learning skills The different yoga methodologies have as their common denominator learning to know oneself and to improve one's various abilities: physical, emotional, cognitive, intuitive and values. To achieve these results, tools are used that structure the body and mind through motor patterns and mental exercises that always consolidate new ways of learning, thus encouraging continuous learning and emancipation from stereotypes.</p>
<p><b>Specific Educational Objectives and Learning Outcomes (additional info.)</b></p>	<p>The course aims to offer proven tools for developing individual responsibility towards oneself and others, resilience to face difficulties and stress, and conscious self-management of one's behavior and social relationships, which, if learned and structured at an early age, constitute behavioral patterns for life.</p>
<p><b>Assessment</b></p>	<p>Individual written research on the topics covered in the course explaining the usefulness of yoga in an educational context and/or the structuring of a yoga session in different educational contexts for pre-school and primary school children with explanations and reasons for the chosen yoga techniques.</p> <p>The papers will be sent in before the examination.</p> <p>The following results are assessed</p> <ul style="list-style-type: none"> <li>- knowledge and application of yoga methodologies for children in various educational contexts</li> <li>- teaching skills and application of the methodologies learnt during the workshop</li> <li>- ability to adapt the methodologies learnt to individual children even in stressful or uncomfortable situations</li> <li>- ability to apply yoga methodologies to improve socialisation and the classroom climate</li> </ul>

	<ul style="list-style-type: none"> <li>- ability to develop through yoga methodologies greater self-awareness in children and to improve their psychophysical well-being, attention and concentration</li> <li>- ability, through the methodologies learnt, to make children recognise and resolve moments of tension and discomfort and develop their security, self-esteem and autonomy</li> <li>- create with the different yoga methodologies the conditions for improving learning with the construction and maintenance of new learning patterns.</li> </ul>
