Syllabus

Kursbeschreibung

Titel der Lehrveranstaltung	Postcolonial Studies
Code der Lehrveranstaltung	47213
Zusätzlicher Titel der Lehrveranstaltung	
Wissenschaftlich-disziplinärer Bereich	SDEA-01/A
Sprache	Englisch
Studiengang	Master in Kritische Kreative Praxis
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	Dott. Alessandra Turchetti, Alessandra.Turchetti@unibz.it https://www.unibz.it/en/faculties/design-art/academic-staff/person/54919
Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Erstes Semester
Studienjahr/e	2nd year
KP	6
Vorlesungsstunden	30
Laboratoriumsstunden	0
Stunden für individuelles Studium	90
Vorgesehene Sprechzeiten	18
Inhaltsangabe	This theoretical module introduces students to the key concepts, histories, and critical frameworks of postcolonial studies, examining the cultural, political, and epistemological legacies of colonialism and their ongoing impact on contemporary societies. The course explores how colonial power structures have shaped systems of knowledge, representation, and identity, and how these are contested and reconfigured in postcolonial contexts.

	Key topics include the foundations of postcolonial theory, the historical trajectories of colonial and postcolonial processes, and the role of representation in constructing and challenging power relations. Particular attention is given to cultural hybridity, resistance practices, and the ways in which artistic and design approaches engage with postcolonial critiques. The course also addresses the intersections between postcolonial thought and globalization, highlighting the persistence of inequalities and the emergence of new cultural and political dynamics. Through lectures, readings, and discussions, students will develop an understanding of how postcolonial perspectives intersect with disciplines such as philosophy, sociology, and environmental studies, fostering a critical awareness of global cultural production and its ethical implications. By engaging with theoretical frameworks and case studies, students will acquire the tools to analyse cultural and artistic practices within postcolonial contexts, and to develop independent, critically informed perspectives on social, political, and cultural issues.
Themen der Lehrveranstaltung	• Foundations of Postcolonial Theory • Colonial and Postcolonial Histories • Representation and Power in Postcolonial Contexts • Cultural Hybridity and Resistance • Globalization and Postcolonial Critiques
Stichwörter	Postcolonial Studies; Coloniality; Race; Visuality; Art and Migration
Empfohlene Voraussetzungen	None
Propädeutische Lehrveranstaltungen	
Unterrichtsform	The course combines lectures, close reading, seminar discussions and the analysis of artistic, visual, curatorial, technological and design practices. Teaching alternates between theoretical sessions and practice-based activities, encouraging students to connect critical concepts with contemporary cultural and creative practices. The course includes collective discussions, case-study analysis, workshops and, where appropriate, guest contributions from practitioners. The final part of the course adopts a situated and interdisciplinary approach to the Mediterranean as a method of

	research and knowledge production, including possible field-based and sound-based activities.
Anwesenheitspflicht	not compulsory but highly recommended
Spezifische Bildungsziele und erwartete Lernergebnisse	Knowledge and understanding Knows ecocritical theories and their applications in visual arts and design have specific knowledge of artistic and design techniques that promote environmental sustainability; Understand the processes of interaction between artistic practices and natural contexts, analysing them while considering the connections with other fields of knowledge, such as philosophy, sociology and environmental sciences. Applying knowledge and understanding Conceive and implement artistic and design projects that respond to contemporary environmental challenges, using sustainable materials and ecological techniques; Develop initiatives that involve local and global communities, promoting greater awareness and action towards environmental sustainability; Collaborate with scientists, activists and other professionals to integrate interdisciplinary knowledge into artistic and design projects. Making judgements Collect and interpret cultural and material data from the fields of art, design, technology and spatial and curatorial practices, demonstrating the ability to place events, works and production operations in the historical context and current trends; Grasp the authority and evaluate the reliability of the various available sources. reflect and express an independent judgement, including on social, ethical and political-cultural issues; Interpret specific facts and events, within subject of their field of study. Communication skills Writing scientific and technical articles and reports with clarity and effectiveness;

	Presenting projects and ideas verbally in a professional and convincing manner. Learning skills The strengthening of the critical and operational autonomy of students; The development of their ability to choose, compare and adapt to new knowledge and technologies.
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	The assessment consists of an oral examination based on the presentation and discussion of an individual final project. Students will develop a research-based project addressing one of the themes explored during the course and connecting theoretical perspectives from Postcolonial and Decolonial Studies with a contemporary artistic, visual, curatorial, technological, design or situated practice. The project may take the form of a critical essay, visual essay, artistic or design research project, curatorial proposal, counter-archive, mapping project or other practice-based outcome. The examination consists of a presentation of the project followed by an oral discussion with the lecturer, during which students are expected to critically discuss their research, methodology, theoretical framework and creative choices. Active participation in class discussions and activities will also contribute to the overall assessment.
Bewertungskriterien	The evaluation will consider: - knowledge and critical understanding of the theoretical concepts addressed in the course; - ability to apply theoretical frameworks to a specific case, practice or research question; - quality and relevance of the research; - ability to establish meaningful connections between theory and creative practice; - development of an independent and situated critical perspective; - coherence between research question, methodology and final

	project; - originality and quality of the proposed project; - ability to clearly articulate and critically discuss the project during the oral examination.
