

## **Syllabus**

## Kursbeschreibung

Titel der Lehrveranstaltung	Large Language Models and Information Retrieval
Code der Lehrveranstaltung	73072
Zusätzlicher Titel der	
Lehrveranstaltung	
Wissenschaftlich-	INF/01
disziplinärer Bereich	
Sprache	Englisch
Studiengang	Master in Computing for Data Science
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	Dr. Andrea Rosani,
	Andrea.Rosani@unibz.it
	https://www.unibz.it/en/faculties/engineering/academic-
	staff/person/43727
Wissensch.	
Mitarbeiter/Mitarbeiterin	
Semester	Erstes Semester
Studienjahr/e	2
KP	6
Vorlesungsstunden	40
Laboratoriumsstunden	20
Stunden für individuelles	90
Studium	
Vorgesehene Sprechzeiten	
Inhaltsangabe	Web and mobile search
	Boolean and vector-space retrieval models
	Efficient document indexing, document mining and topic
	modelling
	Traditional and machine learning-based ranking approaches
	Foundation models     Figure 1 Information Patriculal Systems
	Evaluation of Information Retrieval Systems

Themen der Lehrveranstaltung	This course provides a comprehensive introduction to the principles and techniques of Information Retrieval (IR), focusing on both traditional methods and modern advancements.  • Web and Mobile Search: Techniques for indexing, ranking, and retrieving information in large-scale web environments and mobile contexts, including challenges like personalization, context-
	<ul> <li>awareness, and interface constraints.</li> <li>Boolean and Vector-Space Models: Fundamental retrieval models including Boolean logic and vector space approaches, forming the basis for understanding document representation and relevance scoring.</li> <li>Efficient Indexing, Document Mining, and Topic Modelling: Methods for building scalable indexing structures, mining valuable information from text corpora, and uncovering latent topics using models like LDA.</li> <li>Ranking Algorithms: Traditional and Machine Learning-Based: Examination of classic ranking methods (e.g., BM25, PageRank) alongside machine learning-based techniques, including learning-to-rank and neural models for improved relevance and user satisfaction.</li> <li>Foundation Models: Application of large pre-trained language models (e.g., BERT, GPT) in IR tasks such as semantic search, question answering, and conversational retrieval.</li> <li>Evaluation of IR Systems: Approaches to measuring the effectiveness of retrieval systems using metrics like precision, recall, MAP, and nDCG, as well as methods for conducting user-centered evaluations.</li> </ul>
Stichwörter	Indexing and Ranking Machine Learning for IR LLMs Foundation Models Evaluation Metrics
Empfohlene Voraussetzungen	Programming and algorithm data structures skills, Linear algebra, probability theory, basic machine learning concepts.
Propädeutische Lehrveranstaltungen	
Unterrichtsform	Frontal lectures, exercices, lab.
Anwesenheitspflicht	The attendance is not compulsory, but students are highly encouraged to attend.

Spezifische Bildungsziele	The course belongs to the type "caratterizzanti – discipline
und erwartete	informatiche".
Lernergebnisse	The objective of this course is to present the scientific underpinnings of the field of Information Retrieval (IR). The student will study fundamental, mathematically sophisticated IR concepts first and then more advanced techniques for information filtering and decision support, including transformer-based solutions and LLMs.  This course provides students with a rich and comprehensive catalogue of information search and text processing techniques that can be exploited for the design and implementation of modern
	<ul> <li>IR applications.</li> <li>Knowledge and understanding:</li> <li>D1.4 - Basic knowledge of storing, querying and managing large amounts of data and the associated languages, tools and</li> </ul>
	systems
	Applying knowledge and understanding:
	D2.2 - Ability to address and solve a problem using scientific
	methods
	Making judgments
	D3.2 - Ability to autonomously select the documentation (in the
	form of books, web, magazines, etc.) needed to keep up to date in
	a given sector
	Communication skills
	D4.1 - Ability to use English at an advanced level with
	particular reference to disciplinary terminology.
Spezifisches Bildungsziel	
und erwartete	
Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	Final Project with report + oral exam
	The project will cover the learning outcome D2.2 and D3.2. It will
	consist of the design of an IR system in a specific application
	domain selected by the students.
	The project domain, the attacked problem, the techniques, and the

	obtained results must be described in a report (max. 10 pages). The project report will cover the learning outcome D1.4 and can be done in groups of 2-3 people.
	The oral exam will cover the learning outcome D4.1. It is composed by the discussion of the project and some individual questions on the content of the project itself.
Bewertungskriterien	Evaluation criteria - Project: 50% of the mark - Report: 30% of the mark - Final oral exam: 20% of the mark. Important note: both project and exam are required to be passed.  Criteria for awarding marks
	Project: ability to implement data workflow to apply IR to real-world problems, correctness and clarity of the solution, experimental results, ability to solve IR problems with the appropriate technique.
	Report: ability to describe the proposed solution, with a critical approach describing the methodology and the results.
	Oral exam: ability to present and explain information retrieval concepts, methods and algorithms. ability to select appropriate solutions for IR problems.
Pflichtliteratur	The suggested book for the introduction to information retrieval topics is:
	C. D. Manning, P. Raghavan and H. Schutze. Introduction to Information Retrieval, Cambridge University Press, 2008. (Online: <a href="http://informationretrieval.org">http://informationretrieval.org</a> )
	Papers about the most recent advancements with regards to algorithms, information access modalities and interfaces will be provided during the course in electronic format. Copy of the slides

	will be available as well.
