Syllabus

Kursbeschreibung

Titel der Lehrveranstaltung	Capstone Project
Code der Lehrveranstaltung	73019
Zusätzlicher Titel der Lehrveranstaltung	
Wissenschaftlich-disziplinärer Bereich	IINF-05/A
Sprache	Englisch
Studiengang	Master in Computing for Data Science
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	dr. Davide Lanti, Davide.Lanti@unibz.it https://www.unibz.it/en/faculties/engineering/academic-staff/person/34107
Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Erstes Semester
Studienjahr/e	2
KP	6
Vorlesungsstunden	12
Laboratoriumsstunden	0
Stunden für individuelles Studium	138
Vorgesehene Sprechzeiten	18
Inhaltsangabe	Individual or group project based on real data from a specific application domain in areas such as bioinformatics, internet of things, business information systems, tourism, agriculture.
Themen der Lehrveranstaltung	The course belongs to the type "affini o integrative – formazione affine" in the curricula “Data Analytics” and “Data Management”.

	Data science cannot be taught only on a theoretical level. Students must apply and test their skills on real data, interacting with domain experts. To this end, the students carry out a project on real data taken from concrete application domains, such as bioinformatics, sensors, Internet of things, business information systems, tourism and agriculture. The goals is to acquire professional skills while applying the techniques studied throughout the Masters program. The project is carried out individually or in groups, autonomously under the joint supervision of a professor and one or more domain experts. Individual or group project based on real data from a specific application domain in areas such as bioinformatics, internet of things, business information systems, tourism, agriculture.
Stichwörter	Data Science, Real-World Data Projects
Empfohlene Voraussetzungen	
Propädeutische Lehrveranstaltungen	
Unterrichtsform	Individual or group project.
Anwesenheitspflicht	Attendance of project presentations at the beginning of the course is not compulsory.
Spezifische Bildungsziele und erwartete Lernergebnisse	The course belongs to the type "affini o integrative – formazione affine" in the curricula “Data Analytics” and “Data Management”. Data science cannot be taught only on a theoretical level. Students must apply and test their skills on real data, interacting with domain experts. To this end, the students carry out a project on real data taken from concrete application domains, such as bioinformatics, sensors, Internet of things, business information systems, tourism and agriculture. The goals is to acquire professional skills while applying the techniques studied throughout the Masters program. The project is carried out individually or in groups, autonomously under the joint supervision of a professor and one or more domain experts. Applying knowledge and understanding: • D2.1 - Practical application and evaluation of tools and techniques in the field of data science • D2.2 - Ability to address and solve a problem using scientific

	methods • D2.3 - Ability to analyse, explore and evaluate a data set in specific application domains Making judgments • D3.1 - Ability to plan and, if necessary, re-plan a technical project activity for the analysis and management of data, or for the implementation of corresponding software systems or applications, and to complete it within the defined deadlines • D3.2 - Ability to autonomously select the documentation (in the form of books, web, magazines, etc.) needed to keep up to date in a given sector • D3.3 - Ability to identify reasonable work goals and estimate the resources needed to achieve these goals. Communication skills • D4.1 - Ability to use English at an advanced level with particular reference to disciplinary terminology • D4.2 - Ability to present one's work in a clear and comprehensible way in front of an audience, including non-specialists • D4.3 - Ability to structure and draft scientific and technical documentation • D4.4 - Ability to coordinate the work of a project team and interact positively with team members • D4.5 - Ability to interact and collaborate in the implementation of a project or research with peers and experts Learning skills • D5.1 - Ability to autonomously extend the knowledge acquired during the course of study • D5.2 - Ability to autonomously keep oneself up to date with the developments of the most important areas of data science • D5.3 - Ability to deal with problems in a systematic and creative way and to appropriate problem solving techniques
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	Project work, carried out individually or in groups, evaluated on the basis of the practical application of data science tools and methods (D2), project planning and judgment (D3), communication and

	teamwork (D4), and autonomous learning and problem-solving ability (D5). The project must be complemented by a written report and validated through a brief oral presentation.
Bewertungskriterien	The exam is pass/fail, and is evaluated on the following criteria: • Creativity, skills in critical thinking, ability to apply known and new techniques to real-world problems • Clarity of presentation
Pflichtliteratur	
Weiterführende Literatur	
Weitere Informationen	
Ziele für nachhaltige Entwicklung (SDGs)	Industrie, Innovation und Infrastruktur, Hochwertige Bildung
