Sintesi contenuti	The course is designed to acquire further language skills. A course in specific language for economics students based on the B2 (CEFR). The course focuses on the various styles of language used in the field of economics and business studies and aims to improve the student's receptive, but above all, productive language skills in general. Topics covered include an introduction to more complex grammatical structures used in this field and at this level, with

	subsequent consolidation through the use of practical applications. There will also be emphasis on improving productive skills, so that the students can produce accurate, cohesive texts in German for professional use.
Argomenti dell'insegnamento	The Advanced Technical Language course aims to prepare students for the presentation of a start-up company they have designed themselves. The lessons cover topics that lead to this goal. When planning and implementing the project, the necessary language skills are presented and practised in a realistic context. Topics covered • Job profiles; • Companies: organisation, key data and presentation, corporate identity; • Trade fairs, orders, sales; • Product, manufacturing, marketing.
