Ressumè di contegnus	OFA (obblighi formativi aggiuntivi) - ADDITIONAL STUDY ACHIEVEMENTS: Before the start of the first semester, the faculty offers a preparatory course in mathematics. At the end of that course all new students will have to sit a compulsory test. In case of a negative result or non-participation in the test, additional study achievements (OFA) will be assigned. The additional achievements (OFA) are considered to have been

	completed upon passing the test offered at the end of the OFA exercises. The additional coursework can also be completed by passing the exam at the end of the first teaching module of the 'Mathematics' course (teaching module 1) or the mathematics exam (teaching module 1 + teaching module 2) within the first academic year. If these requirements are not met, students will not be allowed to take the examinations in the quantitative subjects of the second and third years of study ('Statistics for TSE', 'Quantitative Methods in Management' and 'Data Management, Analysis and Protection').
