Syllabus

Titul dl curs	Advanced topics on machine design
Codesc dl curs	47555
Titul suplementar	
SSD	IIND-03/A
Lingaz	Inglese
Curs de laurea	Corso di laurea magistrale in Ingegneria Industriale Meccanica
D'autri cursc de laurea (cursc deberieda)	
Dozenc	prof. Franco Concli, Franco.Concli@unibz.it https://www.unibz.it/en/faculties/engineering/academic-staff/person/34279
Assistent didatich	
Semester	Secondo semestre
Ann/Agn de stude	1
Credic universitars	5
Ores de insegnament	32
Ores de laboratore	12
Ores de stude individual	81
Ores de riceviment prevedudes	15
Ressum� di contegnus	The course aims to introduce the design mind-set and the main methods for the design of mechanical systems, to provide exposure to the practice of design through application and to encourage understanding of the broader implications of design. Students will learn, in the first module, fundamental concepts and methodologies for understanding and modelling mechanical systems. In the second module, the theory of numerical finite element methods is introduced. Emphasis is given to practical applications, especially considering the advantages achievable with the latest

	technologies.
Argomenc dl curs	PART 1: Material behavior and basic concepts • Principle of virtual work • Force Method for the Solution of Hyperstatic Structures • Multi-axial fatigue criteria • Low cycle fatigue of materials PART 2: Machine Elements • Shafts and shaft components • Gears • Bolted connections (screwed joints) • Welded connections
Paroles clef	Machine elements
Prerequisic aconsiés	Machine Design.
Cursc propedeutics	
Modalité de enseignament	The topics are presented by the professor by means of Power Point presentations or the blackboard. A selection of the material presented in class as well as online resources and useful material will be available in the OLE database/. Further deepening material will be supplied or recommended by the teacher.
Oblianza de frecuencia	Recommended
Obietifs formatifs y competenzes da arjonje	Knowledge and understanding: 1) Handle the analysis methods used in structural design of mechanical systems. Applying knowledge and understanding: 2) Know how to face a new project of a mechanical system starting from its functional design. Making judgements: 3) Identify the critical zones and the corresponding stress states of all components of a mechanical system, under service loading conditions. 4) Choose the geometry and materials able to satisfy the requirements of each component in terms of strength, deformation, fatigue life, and so on and realize the technical drawing of the system.

	Communication skills: 5) Oral communication skills (technical language) Learning skills: 6) Ability to autonomously extend the knowledge acquired.
Obietifs formatifs y competenzes da arjonje (informazions suplementares)	
Sort de ejam	- Formative assessment In class and exercises and activities (2,3,4) - Summative assessment The assessment of the course is: • Written exam 3/4 exercises • Oral Exam Open-ended questions - Theoretical knowledge (40%) - Ability to provide examples/applications of the theoretical concepts (30%) - Ability to establish relationships between topics (20%) - Mastery of language (also with respect to teaching language) (10%).
Criters de valutazion	The final mark will be obtained combining the evaluations of the final written test and of the oral examination.
Bibliografia obligatora	Lecture notes and documents for exercise will be available on the reserve collections There is no single textbook that covers the entire course. The course material is collected from various sources that will be announced during the course. A selection of the material presented in class and useful material will be available in the course reserve collection database.
Bibliografia aconsieda	R.S.KHURMI AND J.K. GUPTA, A Textbook of Machine Design, S

	Chand (ENG) Shigley's Mechanical Engineering Design, McGraw-Hill (ENG) G. NIEMANN, H. WINTER, Maschinenelemente, Springer (GER) P. HAEFELE, L. ISSLER, H. RUOSS, fertigungslehre – Grundlagen, Springer (GER) P. DAVOLI, M. FILIPPINI, C. GORLA, A. LO CONTE, Lezioni sugli organi di macchine, Politecnica (ITA) P. DAVOLI, A. BERNCASCONI, M. FILIPPINI, S. FOLETTI, Comportamento meccanico dei materiali, McGraw-Hill (ITA)
