Ressumè di contegnus	M1 Microeconomics Economic Theory: Economic Methods; Optimization; Demand,

	Supply and Equilibrium; Perfect Competition; Trade; Externalities and Public Goods; Taxation; Labor Market, Monopoly; Game Theory; Oligopoly; Information; Social Economics Applied Exercises: Applied, data-driven exercises designed to deepen and reinforce the economic concepts introduced in the lectures through the analysis and interpretation of economic data. M2 Macroeconomics The course represents an introductory economics course that presents the principles of macroeconomics. It gives a general overview over economic key concepts on a scientific basis. The course provides a general overview of the main concepts in intermediate macroeconomics. It aims at enabling students to understand the macroeconomy in the short, medium and long-run, and how it is affected by policy and shocks. We shall examine the causes and consequences of widely cited economic key variables, such as gross domestic/national product, growth rates, inflation, and so on. In particular, we will analyze the determinants of economic growth and why some nations are so rich whereas others are so poor. Moreover, we will discuss the short-run and long-run effects of different types of economic shocks and policies. The main educational objective is to provide the students with the analytical tools required to analyze current economic problems and policies.
Argomenc dl curs	M1 Economic Theory: Economic Methods; Optimization; Demand, Supply and Equilibrium; Perfect Competition; Trade; Externalities and Public Goods; Taxation; Markets for Factors of Production, Monopoly; Game Theory; Oligopoly and Monopolistic Competition; Time and Risk; Information; Social Economics Applied Exercises: Applied, data-driven exercises designed to deepen and reinforce the economic concepts introduced in the lectures through the analysis and interpretation of economic data. Oblianza de frecuencia	suggested but not required
Obietifs formatifs y competenzes da arjonje	M1 - MICROECONOMICS ILO 1 Knowledge and understanding ILO 1.1 knowledge of the economic theory of the demand and supply of goods and services, equilibrium and price-setting mechanisms in market economies ILO 1.2 knowledge of the basic theorems of welfare economics ILO 1.3. an understanding of the behaviour of microeconomic actors, with particular reference to theories of consumption, the firm and the application of game theory ILO 1.4 Knowledge of the fundamentals of political-economic activities and collective decisions ILO 1.5 Understanding the use of non-renewable resources and the principles of sustainability ILO 2 Ability to apply knowledge and understanding ILO 2.1 to be able to carry out an analysis of the demand for goods and services and to evaluate the cost structure, its role and relevance for business decisions

	ILO 2.2 being able to critically compare the various theories of enterprise ILO 2.3 being able to conduct an analysis of the economic behaviour of public and private actors using game theory ILO 2.4 Knowing how to analyse economic activity with regard to sustainability ILO 3 Autonomy of judgement ILO 3.1 identify the most important problems in complex decision-making situations ILO 3.2 perform a critical analysis of the facts and situations to be addressed ILO 3.3 choose the most appropriate quantitative and qualitative methods of analysis ILO 3 Learning skills ILO 4 ILO 4.1 find the information necessary to keep abreast of the changing context, both general and specialised ILO 4.2 analyse, critically process and integrate future data, information and experience, also using advanced software M 2 - MACROECONOMICS ILO 1 Knowledge and understanding ILO 1.1. knowledge of the economic theory of the demand and supply of goods and services, equilibrium and price-setting mechanisms in market economies; ILO 1. 2 knowledge of the theories of competition in markets with respect to classical, neoclassical and evolutionary theoretical models ILO 1.3 knowledge of the basic theorems of welfare economics ILO 1.4 knowledge of the foundations of political-economic activities and collective decisions ILO 1.5 understanding of the role and management of public goods, the role of institutions and information ILO 1.6 understanding of the effect of economic policy actions in specific sectors and the role of research, development and
--	--

	innovation ILO 1.7 knowledge of various macro-economic models for analysing economic changes in the short and medium term, understanding of the causes of economic growth ILO 1.8 Understanding the use of non-renewable resources and the principles of sustainability ILO 2 Ability to apply knowledge and understanding ILO 2.1 be able to conduct an analysis of the role and function of macroeconomic variables in closed economies in the short, medium and long term ILO 2.2 be able to assess the role of governments and the need for economic policy interventions in market economies ILO 2.3 knowing how to formulate economic policy objectives and assess their results, and using the available information to evaluate the appropriateness of monetary and fiscal policies with respect to macroeconomic variables ILO 2.4 know how to analyse economic activity with regard to sustainability ILO 3 Autonomy of judgement ILO 3.1 identify the most important problems in complex decision-making situations ILO 3.2 perform a critical analysis of the facts and situations to be addressed ILO 3.3 choose the most appropriate quantitative and qualitative methods of analysis ILO 4 Learning skills ILO 4.1 find the information necessary to keep abreast of the changing context, both general and specialised ILO 4.2 analyse, critically process and integrate future data, information and experience, also using advanced software
Obietifs formatifs y competenzes da arjonje (informazioni)	This course refers to a basic educational activity and is a mandatory course in the first study year.

suplementares)	The main goal of the course is to introduce students to the distinctive structure of economic reasoning and to provide a solid grounding in the basic concepts and methods of microeconomics and macroeconomics. Microeconomics (M1): Students will explore key principles such as supply and demand, market equilibrium, consumer and producer behavior, and the role of incentives in shaping economic outcomes. An additional objective is to equip students with practical skills in analyzing and interpreting economic data. Through lab sessions, students will work on applied, data-driven exercises that deepen and reinforce the concepts introduced in the lectures. Students will analyse and interpret economic data, connect empirical evidence to economic theory, and strengthen their ability to think critically and quantitatively about economic questions.
Sort de ejam	M1 Microeconomics: For attending and non-attending students. Student performance will be evaluated through a final written exam, which accounts for 100% of the final grade. The exam consists of multiple-choice questions. The exam is based on the material covered in the required textbook and the lecture slides provided by the instructor. ILOs assessed: 1-4. M2 Macroeconomics: For attending and non-attending students. Student performance will be evaluated through a final written exam, which accounts for 100% of the final grade. The exam consists of multiple-choice questions. The exam is based on the material covered in the required textbook and the lecture slides provided by the instructor. ILOs assessed: (ILO 1.1-1.8, 2.1-2.4, 3.1-3.3, 4.1,4.2) M2 Macroeconomics: For attending and non-attending students. Student performance will be evaluated through a final written exam, which accounts for 100% of the final grade. The exam consists of multiple-choice questions. The exam is based on the material covered in the required textbook and the lecture slides provided by the instructor. ILOs assessed: (ILO 1.1-1.8, 2.1-2.4, 3.1-3.3, 4.1,4.2)

Criters de valutazion	Answers will be assessed based on the correctness of both the reasoning process and the final result.
