

# Syllabus

## *Descrizione corso*

<b>Titolo insegnamento</b>	Laboratorio di Edilizia ad alte prestazioni: comfort, efficienza energetica
<b>Codice insegnamento</b>	42642
<b>Titolo aggiuntivo</b>	
<b>Settore Scientifico-Disciplinare</b>	NN
<b>Lingua</b>	Inglese
<b>Corso di Studio</b>	Corso di laurea professionalizzante in Tecnologie del Legno
<b>Altri Corsi di Studio (mutuati)</b>	
<b>Docenti</b>	prof. Giovanni Pernigotto, Giovanni.Pernigotto@unibz.it <a href="https://www.unibz.it/en/faculties/engineering/academic-staff/person/30622">https://www.unibz.it/en/faculties/engineering/academic-staff/person/30622</a>
<b>Assistente</b>	
<b>Semestre</b>	Primo semestre
<b>Anno/i di corso</b>	3
<b>CFU</b>	2
<b>Ore didattica frontale</b>	20
<b>Ore di laboratorio</b>	0
<b>Ore di studio individuale</b>	30
<b>Ore di ricevimento previste</b>	
<b>Sintesi contenuti</b>	<ul style="list-style-type: none"> <li>• Knowledge of instruments and tools to characterize the thermal behaviour of building materials and building envelope elements.</li> <li>• Knowledge of instruments to monitor Indoor Environmental Quality.</li> <li>• Calculation tools to assess the thermal behaviour of building envelope element and connection nodes</li> <li>• Calculation tools to assess the energy performance of the whole building system, specific HVAC subsystems and artificial lighting systems.</li> </ul>

<b>Argomenti dell'insegnamento</b>	<p>The present laboratory deals with the practical aspects of the design of high-performance buildings. It consists of 20 hours of practical activities carried out both in the Laboratories of Building Physics of the Free University of Bozen-Bolzano at the NOI Techpark and in university classrooms (exercises, computer modelling and energy simulations).</p> <p>Laboratory activities will be related to:</p> <ul style="list-style-type: none"> <li>- Characterization of the thermo-physical properties of building materials.</li> <li>- Measurement of heat flux through building envelope elements.</li> <li>- Characterization of Indoor Environmental Quality through the use of different monitoring instruments.</li> </ul> <p>Exercise activities will be related to:</p> <ul style="list-style-type: none"> <li>- Calculation of thermos-hygrometric and energy performance of building elements (windows, walls) and connection nodes (thermal bridges).</li> <li>- Calculation of the energy performance of case-study building envelope configurations.</li> <li>- Calculation of the energy performance of case-study building HVAC configurations / artificial lighting systems.</li> </ul>
<b>Parole chiave</b>	<p>building energy performance; indoor environmental quality; heat flux measurement; temperature measurement</p>
<b>Prerequisiti</b>	<p>Heat and mass transfer (preferably).</p>
<b>Insegnamenti propedeutici</b>	
<b>Modalità di insegnamento</b>	<p>Practical lectures in the Building Physics Labs and exercise lectures in the classroom. Teaching material and additional materials will be provided during the semester.</p>
<b>Obbligo di frequenza</b>	<p>Strongly recommended.</p>
<b>Obiettivi formativi specifici e risultati di apprendimento attesi</b>	<p>The present laboratory deals with the practical aspects of the design of high-performance buildings. It consists of 20 hours of practical activities carried out both in the Laboratories of Building Physics of the Free University of Bozen-Bolzano at the NOI Techpark and in university classrooms (exercises, computer modelling and energy simulations).</p> <p>Laboratory activities will be related to:</p> <ul style="list-style-type: none"> <li>- Characterization of the thermo-physical properties of building materials.</li> <li>- Measurement of heat flux through building envelope elements.</li> </ul>

	<ul style="list-style-type: none"> <li>- Characterization of Indoor Environmental Quality through the use of different monitoring instruments.</li> </ul> <p>Exercise activities will be related to:</p> <ul style="list-style-type: none"> <li>- Calculation of thermos-hygrometric and energy performance of building elements (windows, walls) and connection nodes (thermal bridges).</li> <li>- Calculation of the energy performance of case-study building envelope configurations.</li> <li>- Calculation of the energy performance of case-study building HVAC configurations / artificial lighting systems.</li> </ul> <p>Intended Learning Outcomes (ILO):</p> <p>Knowledge and understanding</p> <ol style="list-style-type: none"> <li>1. Knowledge of the calculation methods described by the current technical standards for building energy performance assessment. Knowledge of the laws currently in force regarding building energy efficiency and requirements.</li> </ol> <p>Applying knowledge and understanding</p> <ol style="list-style-type: none"> <li>2. Capability to implement the procedures described by the technical standards; capability to develop design and diagnostic skills related to energy efficiency, comfort, and indoor lighting; capability to improve the energy performance of a real case-study.</li> </ol> <p>Making judgements</p> <ol style="list-style-type: none"> <li>3. The student will be able to assess the energy performance of both existing and new buildings, to identify the critical aspects and suggest improvement solutions.</li> </ol> <p>Communication skills</p> <ol style="list-style-type: none"> <li>4. The student will be able to discuss the learned knowledge with vocabulary and technical terms of the discipline.</li> </ol> <p>Ability to learn</p> <ol style="list-style-type: none"> <li>5. Lifelong learning capability through the acquisition of critical tools and critical evaluation of product specifications.</li> </ol>
<p><b>Obiettivi formativi specifici e risultati di apprendimento attesi (ulteriori info.)</b></p>	

<b>Modalità di esame</b>	<p>No exam is required. Students are either marked as "Passed" or "Failed".</p> <p>Attendance is strongly recommended, even if it is not mandatory.</p>
<b>Criteri di valutazione</b>	<p>No exam is required. Students are either marked as "Passed" or "Failed".</p> <p>Attendance is strongly recommended, even if it is not mandatory.</p>
<b>Bibliografia obbligatoria</b>	<p>Lessons and slides of the course</p>
<b>Bibliografia facoltativa</b>	<p>Technical standards and, in particular:</p> <ul style="list-style-type: none"> <li>- UNI EN ISO 6946:2018</li> <li>- UNI EN ISO 52016-1:2018</li> <li>- UNI/TS 11300-1:2014</li> <li>- UNI EN ISO 10211:2018</li> <li>- UNI EN ISO 10077-1:2018 and -2:2018</li> <li>- EN 16798-1:2019</li> <li>- EN 12464-1:2021</li> </ul>
<b>Altre informazioni</b>	<p>Software used:</p> <p>Main tools used during the course:</p> <ul style="list-style-type: none"> <li>• Berkeley Lab THERM (freeware, <a href="https://windows.lbl.gov/therm-software-downloads">https://windows.lbl.gov/therm-software-downloads</a>)</li> <li>• Berkeley Lab WINDOW (freeware, <a href="https://windows.lbl.gov/window-software-downloads">https://windows.lbl.gov/window-software-downloads</a>)</li> <li>• DIALux evo (freeware, <a href="https://www.dialux.com/en-GB/dialux">https://www.dialux.com/en-GB/dialux</a>)</li> </ul>
<b>Obiettivi di Sviluppo Sostenibile (SDGs)</b>	<p>Buona salute, Città e comunità sostenibili, Energia rinnovabile e accessibile</p>
