Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	Written and oral examinations: the examination takes into account the examinations carried out in progress (closed and open written examinations and possible oral expositions), which focus on knowledge of the topics and concepts covered, the ability to apply knowledge and understanding, critical analysis and reflection. Notice will be given in the lecture room as to how the mid-term assessments of the individual subjects will be conducted. In the event of a negative assessment for the entire module, any partial examinations taken with a positive result will be considered as already passed at the next attempt to take the entire module examination. It should be borne in mind that, even in this case, a negative mark for the entire module will be counted towards the number of attempts available to take an exam. According to the Regulation of Examinations, if a student fails an examination in three consecutive attempts, he/she may not enrol for the same examination in the three sessions following the last attempt (Art. 6(4) of the current Regulation of Proficiency Examinations).
Bewertungskriterien	The examination provides for a single final mark, which is the weighted average of the marks of the different parts of the examination (oral and written). The final mark is based on the assessment of the following tests - written test (Pedagogy and didactics of inclusion for children, theoretical course); - written examination (or oral examination) and project work (Intercultural pedagogy and didactics of inclusion for children,

	theoretical course); - portfolio for the workshops. The module assessment takes into account the following criteria: relevance, logical structure and clarity of argumentation; capacity for critical analysis, re-elaboration and reflection; ability to transpose theory into practice and to associate theory with practice; lexical appropriateness and completeness.

Inhaltsangabe	The aim of this workshop is to get the students to work, starting from the theoretical concepts addressed in the module, on operational proposals to be applied in school and educational

	contexts.
Themen der Lehrveranstaltung	In particular, we will touch on a number of tracks proposed in intercultural pedagogy aimed at thematic reflections such as diversity, emotions, communication, through the analysis of fairy tales in the form of tales or animated videos: these represent narrative genres present in the oral tradition of every people and thus a didactic tool capable of fostering the exchange between different imaginaries, traditions and customs and creating meeting points. - Diversity and equality - diversity: pedagogical reflections - Culture: definitions, approaches and tools - Interculture, communication and storytelling - Fairytale and fable: contexts and types of communication - Didactics with narration from an intercultural perspective - Interculture as a learning resource
Unterrichtsform	During the workshop, presentations of the main course topics will alternate with workshop activities and analysis of experiences. Power point slides, films, printed and online documentation will be used. At the end of the workshop, a group project work will be produced, using a fairy tale as the object of intercultural didactic work, identifying the target audience, rules and context of reference or producing one for intercultural reflection.
