

Syllabus

Kursbeschreibung

Titel der Lehrveranstaltung	Advanced topics on machine design
Code der Lehrveranstaltung	47555
Zusätzlicher Titel der Lehrveranstaltung	
Wissenschaftlich-disziplinärer Bereich	IIND-03/A
Sprache	Englisch
Studiengang	Master in Industrie- und Maschineningenieurwesen
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	Prof. Franco Concli, Franco.Concli@unibz.it https://www.unibz.it/en/faculties/engineering/academic-staff/person/34279
Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Zweites Semester
Studienjahr/e	1
KP	5
Vorlesungsstunden	32
Laboratoriumsstunden	12
Stunden für individuelles Studium	81
Vorgesehene Sprechzeiten	
Inhaltsangabe	The course aims to introduce the design mind-set and the main methods for the design of mechanical systems, to provide exposure to the practice of design through application and to encourage understanding of the broader implications of design. Students will learn, in the first module, fundamental concepts and methodologies for understanding and modelling mechanical systems.

	In the second module, the theory of numerical finite element methods is introduced. Emphasis is given to practical applications, especially considering the advantages achievable with the latest technologies.
Themen der Lehrveranstaltung	PART 1: Material behavior and basic concepts 1. Principle of virtual work 2. Force Method for the solution of Hyperstatic Structures 3. Multi-axial fatigue criteria a. Critical plane concepts 4. Low cycle fatigue of materials a. Masing Hp. b. Ramberg-Osgood eq. c. Neuber Hp. d. Basquin-Coffin-Manson eq. e. Loading spectra PART 2: Machine Elements 5. Shafts and shaft components a. Interference fits (shaft-hub connection) b. Deflections 6. Gears a. Failure modes (bending - pitting - micro pitting - scuffing) b. Gear types (spur - helical - bevel - worm) c. Gear configurations (parallel axis, orthogonal axis, planetary) d. Synthetic factors (sizing) e. Strength calculation (ISO 6336) f. Gear stiffness (Deformation under load) g. Examples of gearboxes (motorcycle and car transmissions) 7. Bolted connections (screwed joints) a. Pretension b. Tearing c. Sheet yielding 8. Welded connections a. Pressure vessel.
Stichwörter	Machine elements
Empfohlene Voraussetzungen	Machine Design.
Propädeutische Lehrveranstaltungen	

Unterrichtsform	The topics are presented by the professor by means of Power Point presentations or the blackboard. A selection of the material presented in class as well as online resources and useful material will be available in the OLE database/. Further deepening material will be supplied or recommended by the teacher.
Anwesenheitspflicht	Recommended
Spezifische Bildungsziele und erwartete Lernergebnisse	Knowledge and understanding: 1) Handle the analysis methods used in structural design of mechanical systems. Applying knowledge and understanding: 2) Know how to face a new project of a mechanical system starting from its functional design. Making judgements: 3) Identify the critical zones and the corresponding stress states of all components of a mechanical system, under service loading conditions. 4) Choose the geometry and materials able to satisfy the requirements of each component in terms of strength, deformation, fatigue life, and so on and realize the technical drawing of the system. Communication skills: 5) Oral communication skills (technical language) Learning skills: 6) Ability to autonomously extend the knowledge acquired.
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	- Formative assessment In class and exercises and activities (2,3,4) - Summative assessment The assessment of the course is: • Written exam

	3/4 exercises • Oral Exam Open-ended questions - Theoretical knowledge (40%) - Ability to provide examples/applications of the theoretical concepts (30%) - Ability to establish relationships between topics (20%) - Mastery of language (also with respect to teaching language) (10%).
Bewertungskriterien	The final mark will be obtained combining the evaluations of the final written test and of the oral examination.
Pfichtliteratur	Lecture notes and documents for exercise will be available on the reserve collections There is no single textbook that covers the entire course. The course material is collected from various sources that will be announced during the course. A selection of the material presented in class and useful material will be available in the course reserve collection database.
