<b>Inhaltsangabe</b>	<p>The type of course is “affine integrative” and the scientific area is “formazione affine”.</p> <p>Computer scientists learn to master a unique language that allow them to program machines. Such effective communication is a core skill in any domain, but it assumes particular importance for computer scientists, who need to communicate complex problems</p>

	<p>and concepts. Many different situations (thesis, job interview, fundraising, public presentation, scientific conference, technical pitch etc.) require the presenter to be able to convey effectively and efficiently the technical/scientific content, whatever the audience, the content and its complexity.</p> <p>This specifically designed course aims to develop students' proficiency in using academic and scientific English at the C1 level and above.</p> <p>It covers some of the main areas of scientific and academic communication that students encounter to assist them in the linguistic aspects of their research and it aims to help students with the drafting and writing of their final thesis.</p>
<b>Themen der Lehrveranstaltung</b>	<ul style="list-style-type: none"> <li>- Writing skills: improvement of academic and scientific written skills through the practice and production of subject-specific texts;</li> <li>- Spoken skills: improvement of spoken interaction and production through the practice and production of academically and professionally acceptable presentations and other domain-specific speaking activities;</li> <li>- Development of receptive skills through the exposure to and analysis of various types of written and spoken discourse typical of undergraduate studies in Computer ScienceI</li> </ul>
