Contents Summary	The course conveys the foundations of cultural anthropology in its extension through the presentation of data, biographies, methods, artefacts and texts.
Course Topics	Course Introduction and Objectives: As anthropologist Andrew Mathews observes, "Anthropology allows you to be curious about everything, from poetry to history to climate change models. It's a difficult discipline, but we can give answers to problems in a way other disciplines don't." This course provides a comprehensive introduction to anthropological theory and methodology, demonstrating its particular relevance to

	<p>questions surrounding art, design, and cultural expression. Anthropology distinguishes itself as the discipline that systematically examines socio-cultural relationships, practices, knowledge systems, and the construction of meaning across diverse cultural contexts through ethnographic research. Central to anthropological inquiry is ethnography, where the most compelling analytical challenge lies not merely in documenting verbal exchanges, but in interpreting underlying meanings and recognizing the communicative significance of what remains unspoken. The ethnographic study and analysis of cultural practices constitutes the methodological foundation of anthropological research.</p> <p>Course Framework and Contemporary Relevance: This course contextualizes cultural plurality and diversity within art and design by engaging with pressing contemporary issues. Students will acquire analytical and methodological tools essential for ethnographic research, enabling them to investigate the perspectives and experiences of both human and more-than-human beings through rigorous fieldwork approaches.</p>
<b>Keywords</b>	Anthropological theory and methodology/ethnography; socio-cultural relationships, practices, knowledge systems; diverse cultural contexts; underlying meaning, unspoken values; art, design in relation to pressing contemporary issues
<b>Recommended Prerequisites</b>	
<b>Propaedeutic Courses</b>	
<b>Teaching Format</b>	This course combines structured lectures with collaborative group work, hands-on exercises, student presentations, and class discussions. This blended approach ensures theoretical grounding while promoting active participation, practical application of concepts, and collaborative learning through critical dialogue and peer engagement.
<b>Mandatory Attendance</b>	not compulsory but recommended

<b>Specific Educational Objectives and Learning Outcomes (additional info.)</b>	<p>The course aim is to integrate anthropological perspectives into perception and analysis of cultural crafts and artistic expressions. Additionally, the course will prepare students for a critical engagement with scientific texts and help them develop appropriate academic writing skills. The critical reflection on concepts such as human relationship with nature (ecology) or cultural relativism related to aesthetics will lead to new understanding of bottom up approaches and grounded empirics.</p>

<b>Assessment</b>	<p>Assessment is based on written minutes on four main texts as well as on an ethnographic exercise and its written elaboration.</p> <p>Non-attending students will prepare four written minutes on four main texts and write either a critical paper about an ethnographic film or a paper based on main texts discussed during the lecture.</p> <p>The final oral exam will be used to verify the capacity to apply the concepts elaborated in class and instruments relevant to art and design.</p> <p>Assessment Language: English</p> <p>ALL THE STUDENTS ATTENDING THE EXAM AS "OPT" OR AS NON-ATTENDING STUDENTS MUST AGREE UPON THE CONTENTS WITH THE TEACHER.</p>
<b>Evaluation Criteria</b>	<p>Evaluation Criteria and Criteria for Awarding Marks:</p> <p>Criteria for the evaluation of the final paper and reading minutes will consider the ability to accurately apply course concepts and methods, the attempt to express original opinions and analyses, and the logical structure of exposition and argumentation.</p>
