

# Syllabus

## *Descrizione corso*

<b>Titolo insegnamento</b>	Lezioni orientate alla pratica per scienze naturali per insegnanti di scuola primaria/insegnanti di scuola materna (lab).
<b>Codice insegnamento</b>	12485
<b>Titolo aggiuntivo</b>	
<b>Settore Scientifico-Disciplinare</b>	BIOS-01/A
<b>Lingua</b>	Tedesco
<b>Corso di Studio</b>	Corso di laurea magistrale a ciclo unico in Scienze della Formazione primaria - sezione in lingua tedesca
<b>Altri Corsi di Studio (mutuati)</b>	LM-85 bis Education Italian section LM-85 bis Education Ladin section
<b>Docenti</b>	Dr. rer. nat. Andreas Declara, Andreas.Declara@unibz.it <a href="https://www.unibz.it/en/faculties/education/academic-staff/person/39593">https://www.unibz.it/en/faculties/education/academic-staff/person/39593</a>
<b>Assistente</b>	
<b>Semestre</b>	Secondo semestre
<b>Anno/i di corso</b>	Wahlfach/Optional course
<b>CFU</b>	2
<b>Ore didattica frontale</b>	0
<b>Ore di laboratorio</b>	20
<b>Ore di studio individuale</b>	30
<b>Ore di ricevimento previste</b>	6
<b>Sintesi contenuti</b>	Full-day excursions on foot or by bike in the surroundings of Brixen to different habitats, preparation of a food ring and a herbarium in the laboratory or at home.
<b>Argomenti dell'insegnamento</b>	<ul style="list-style-type: none"><li>- Focus on zoology and botany in their significance for kindergarten and primary school and their application in kindergarten and primary school</li><li>- Basics of outdoor biology and ecology in their significance for</li></ul>

	<p>kindergarten and primary school and their application in kindergarten and primary school</p> <ul style="list-style-type: none"> <li>- Concrete application examples for the outdoor area (e.g. feeding ring...)</li> <li>- Concrete natural phenomena and observations as topics and focal points of didactic teaching</li> <li>- Local environmental protection and nature conservation as well as sustainable development in their pedagogical-didactic significance</li> <li>- Leading excursions - arousing interest</li> <li>- Teaching content on selected animals, plants and areas of the natural and cultural landscape</li> <li>- Encountering and recognising biocenoses and highlighting their educational and didactic importance for kindergarten and primary school</li> <li>- The conifers of our homeland, animals of the forest, biocenoses of local waters, metamorphosis in amphibians, holo- and hemimetabolism in insects</li> </ul>
<b>Parole chiave</b>	<p>Nature</p> <p>Sustainability</p> <p>Ecosystems</p> <p>Habitats</p> <p>Biodiversity</p> <p>Species diversity</p>
<b>Prerequisiti</b>	
<b>Insegnamenti propedeutici</b>	
<b>Modalità di insegnamento</b>	<ul style="list-style-type: none"> <li>- Introductory lectures</li> <li>- Excursions to different habitats in the surroundings of Brixen: Brixen-Klausen-Vahrn, low mountain range of Brixen and Ploseberg (possible expenses for excursions will be paid by the students themselves)</li> <li>- Preparation of a food ring and a herbarium in the laboratory or at home</li> </ul>
<b>Obbligo di frequenza</b>	In accordance with the regulation
<b>Obiettivi formativi specifici e risultati di apprendimento attesi</b>	<p>The students</p> <ul style="list-style-type: none"> <li>- are familiar with the basic principles of biology and ecology, can assess their significance for kindergarten and primary school and prepare content in a way that is appropriate for the target group</li> </ul>

	<ul style="list-style-type: none"><li>- are familiar with the fundamentals and concepts of contemporary didactics of living nature and are able to transfer between general models and subject-specific application</li><li>- are able to analyse relationships between humans, the biosphere and the cultural landscape and translate them into didactic concepts.</li><li>- know the importance of environmental protection and sustainable development for kindergarten and primary school, can critically analyse these topics and implement them didactically.</li><li>- are able to plan, implement, reflect on and evaluate didactic units on the topic of living nature.</li><li>- are able to compare the framework guidelines for kindergarten and the framework guidelines for primary school and use them as a basis for planning their educational work and lessons.</li><li>- are able to independently acquire subject-specific knowledge about living nature and have the necessary scientific foundations to utilise different didactic concepts with regard to the heterogeneous learning requirements of the children.</li><li>- can place the children's questions about scientific phenomena of living nature at the centre of their educational and didactic work and help the children to answer their questions through exploratory or research-based learning.</li><li>- can incorporate the children's (everyday) ideas into their planning as a starting point for "learning through research".</li></ul>
	<p>Expected learning outcomes and competences:</p> <p><b>Knowledge and understanding</b></p> <p>Graduates know about the fundamental relationships between outdoor biology, ecology and limnology with a focus on zoology and botany, recognise natural phenomena and have understood them.</p> <p><b>Applying knowledge and understanding</b></p> <p>They can formulate arguments for their pedagogical and didactic actions and use them to substantiate their actions. They can apply this knowledge to prepare learning content in a way that is appropriate for the target group and to create suitable learning environments.</p>

	<p><b>Making judgements</b>      They can evaluate prepared/published teaching materials in terms of content and didactics and use them accordingly for their lessons and correctly assess, evaluate and reflect on new teaching situations.</p> <p><b>Communication</b>      You can formulate subject content, ideas, problems and solution strategies in a way that is appropriate to the target group and communicate them in a didactically appropriate manner.</p> <p><b>Learning strategies</b>      Based on the knowledge and skills acquired in the courses, they can independently acquire and, if necessary, deepen subject-specific and didactic content.</p>
<b>Obiettivi formativi specifici e risultati di apprendimento attesi (ulteriori info.)</b>	
<b>Modalità di esame</b>	<p>Practical written part: Preparation and description of the production of a herbarium and a food ring, writing of an excursion report</p> <p>Oral part: Recognising illustrative materials and a short presentation of what has been learned.</p>
<b>Criteri di valutazione</b>	<p>The assessment is based on the topics covered, the expected learning outcomes and the specific educational objectives in accordance with this syllabus</p>
