

Syllabus

Kursbeschreibung

Titel der Lehrveranstaltung	Theory of Scientific Method
Code der Lehrveranstaltung	46047
Zusätzlicher Titel der Lehrveranstaltung	
Wissenschaftlich-disziplinärer Bereich	NN
Sprache	Englisch
Studiengang	Doktoratsstudium in Food Engineering and Biotechnology (Lebensmittelbiotechnologien und -Ingenieurwesen)
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	Prof. Dr. Hannes Schuler, Hannes.Schuler@unibz.it https://www.unibz.it/en/faculties/agricultural-environmental-food-sciences/academic-staff/person/34023
Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Erstes Semester
Studienjahr/e	1
KP	4
Vorlesungsstunden	32
Laboratoriumsstunden	8
Stunden für individuelles Studium	60
Vorgesehene Sprechzeiten	12
Inhaltsangabe	This introductory course has two goals: first, the course will introduce you into various aspects of scientific methods. Second, in theoretical lectures and practical exercises students will learn how to perform a scientific study and how to present your scientific data. Regardless of what discipline students are in, the knowledge of scientific methods proves to be instrumental for academic

	research both as a PhD student and beyond. Among the covered topics: introduction on being a scientist, responsible conducting of research and experimental design. One will get insights on how to read, write and review a paper, how to apply for conferences and awards and how to handle literature. This course will be an introduction on how to survive academia as an early career scientist. In this course, students will develop scientific ideas, as well as learn strategies for to organize, plan and perform your research. They will also gain methods how to critically read and evaluate scientific papers and communicate and present scientific data.
Themen der Lehrveranstaltung	Introduction on being a scientist, responsible conducting of research and experimental design. You will get insights on how to read, write and review a paper, how to apply for conferences and awards and how to handle your literature. The course covers theoretical lectures as well as practical activities. A two-days mock conference will conclude the lecture where you present your posters or make an oral presentation.
Stichwörter	Scientific Methods, Scientific papers, Scientific Publishing, Seminar presentations, Peer Review
Empfohlene Voraussetzungen	none
Propädeutische Lehrveranstaltungen	
Unterrichtsform	The course covers theoretical lectures as well as practical activities. A two-days mock conference will conclude the lecture where you present your posters or make an oral presentation.
Anwesenheitspflicht	compulsary
Spezifische Bildungsziele und erwartete Lernergebnisse	1. Knowledge and Understanding: Students will gain a foundational understanding of the academic environment and scientific research processes, including how to survive and thrive as early career scientists. This includes developing scientific ideas and learning the principles underlying effective research design and analysis. 2. Applying Knowledge and Understanding: Participants will apply their knowledge by organizing, planning, and conducting their own PhD projects. They will also practice critical reading and evaluation of scientific papers, enhancing their ability to implement

	research methodologies in real-world scenarios. 3. Making Judgements: Students will develop the ability to critically assess scientific literature, identify strengths and weaknesses in research, and make informed decisions about experimental design and data interpretation. 4. Communication Skills: Students will improve their ability to communicate scientific ideas and results clearly and effectively, both in written essays and through oral presentations at the “mock conference”. 5. Learning Skills: Through active participation and engagement with both required and supplementary readings, students will enhance their independent learning skills and develop strategies for continuous professional development in academia.
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	Because the main part of the progress towards the learning outcomes takes place in classroom, your regular participation on 80% of the classes is essential. You will be evaluated based on the active participation during the course, the written essay of an abstract and your final presentation at the Mock conference
Bewertungskriterien	Active participation, contribution of written essays and the final presentation at the “mock conference” are required to pass the class.
Pfichtliteratur	The presentations will be uploaded on the Teams channel of the course.
