Inhaltsangabe	<p>Participants will consolidate, deepen, and expand skills, knowledge and competences acquired during the English courses attended in year 4, as well as move into new fields of study in TEYL. Students will be able to understand and participate in extended speech and lectures and follow complex lines of argument on course topics.</p> <p>In particular, the course addresses theoretical and practical issues related to learning and teaching approaches, course design, lesson planning, assessment, and materials in TEYL. Current theories and key aspects of the acquisition of English by children at the pre-primary and primary education levels will be used to discuss several key teaching approaches and practices. Emphasis will be placed on contemporary approaches, including communicative language teaching, the lexical approach, total physical response (TPR), as well as holistic approaches to language, such as multimodal and story-based strategies. Participants will be shown how perspectives on language learning and teaching can be incorporated into syllabus design with reference to young learners (YLS). Underlying principles and elements of lesson planning will be described and discussed, focusing on structures and procedures that have been found to be particularly effective with young and very young learners of English as a second and further language. Furthermore, key principles underlying the evaluation, selection, adaptation, and supplementation of materials for YLS will be presented and reflected upon. Finally, principles of evaluation of English language teaching to YLS will be addressed, focusing in particular on teacher self-evaluation as an integral part of a teaching process.</p> <p>Overall, participants will develop a concrete understanding of elements that inform best practice in TEYL.</p>
Themen der Lehrveranstaltung	<p>Course topics will include theoretical notions on:</p> <ul style="list-style-type: none"> - principles in YL teaching contexts; - key methods and approaches in TEYL; - practices in TEYL; - storytelling with YLS; - the contemporary classroom and language learner in a globalised world; - teaching materials for YLS; - teacher talk and discourse techniques in the YL classroom;

	- evaluation of teaching in YL contexts.

Inhaltsangabe	<p>The laboratory offers a space where teacher-trainees can operationalise the knowledge and competences gained through lectures in a hands-on fashion in order to practise instructed language learning in English as a foreign language (EFL) with young learners. The lab. adopts a project-based approach in which participants work on concrete tasks in order to plan and create a teaching unit (TU) suitable for preschool or primary school, applying strategies of macroplanning and microplanning. The TU comprises lesson plans, instructional activities, assessments, and materials aimed at helping young learners develop their knowledge of English lexis and grammar structures and their use of English for communication through the functional skills of speaking, listening, reading, and writing.</p>

Themen der Lehrveranstaltung	<p>Planning and creating a Teaching Unit (TU) for the ELT classroom, including:</p> <ul style="list-style-type: none"> - identifying language learning aims - planning instructional activities and materials - developing assessments to measure learning outcomes. <p>The TU contains a series of lesson plans that take into account the following factors: age/stage of learners; suitable lexis and grammar structures; timing and sequencing of activities; classroom setting; teaching-learning approaches; selection and use of materials; CEFR in teaching English to YLs; provincial and national guidelines; plan-do-review cycle of learning; 3-H framework (head, heart, hands) for engaging young learners.</p> <p>The final assignment will be assessed according to the following criteria:</p> <ul style="list-style-type: none"> - achievement of task; - suitability of TU content for language learning by YLs; - coherence of planned activities and tasks; alignment of learning aims, instruction and assessments; - application of child-centred learning theories and instructional approaches; - design quality of the TU. <p>A detailed assessment rubric will be made available to students during the lab.</p> <p>The final mark conflates all of the assessments relating to the lecture (60%) and the lab. activities and tasks (40%), and is decided collegially during the grading meeting between all teachers of the module on the basis of such assessments.</p> <p>In the case of a negative assessment, any positively assessed components of the module will be credited at the next module examination.
