Sintesi contenuti	M1 - Module M1 "Economic Policy and Sustainable Development" explores the role of public policy in achieving sustainable development goals (SDGs) through economic interventions. Students will gain knowledge of the tools used in sustainable policy formulation. The course aims to equip students with the analytical skills needed to assess and design effective public policies for sustainable economic development.

	<p>M2 - Module M2 "Public Management and Innovation" provides a structured introduction to the principles, functions, and contemporary challenges of management in the public sector, with a particular emphasis on innovation as a means of enhancing administrative capacity, responsiveness, and societal impact. Special attention is given to the distinctive institutional and political context in which public management operates, including its legal frameworks, accountability mechanisms, and value-driven objectives. Innovation is examined both as a managerial practice and as a policy imperative, particularly in relation to digital transformation, citizen engagement, and sustainable development. Core themes may include: models of public governance, strategic management in the public sector, organizational learning and change, innovation processes, sustainability-oriented public services, and collaborative approaches involving multiple stakeholders.</p>
