Specific Educational Objectives and Learning Outcomes

Knowledge and understanding

The student will acquire knowledge of organisational models, the business factors involved in the organisation of public enterprises operating in different sectors (international organisations, central government, local authorities, health, public enterprises) and the consequences for the community.

The student will also acquire knowledge necessary for developing, managing and evaluating the impact of public projects, and knowledge useful for analysing organisational innovation processes and interpreting current tools and trends relating to personnel management in public companies."

Autonomy of judgement

The student will acquire the ability to:

- apply the knowledge acquired to interpret economic and business phenomena in order to make managerial and operational decisions in the context of public administration;
- select data and use appropriate information to describe a problem concerning the design, implementation and evaluation of public sector projects and policies, aiming at innovation and improvement of processes, products and results.

Communication skills

The student will acquire the ability to communicate effectively in oral and written form the specialised content of individual disciplines, using different registers according to target audience and communicative and didactic purposes, and to evaluate the educational effects of his/her communication.

Learning skills

The student will acquire the ability to:

- use information technology autonomously to carry out bibliographic research and investigations and for one's own training and updating;
- identify thematic links and establish relationships between different cases and contexts of analysis;

	- frame a new problem systematically and generate appropriate taxonomies;
	- develop general models from the phenomena studied.
