Recommended Prerequisites	

Propaedeutic Courses	
Teaching Format	
Mandatory Attendance	Suggested, but not required
Specific Educational	Knowledge and understanding:
Objectives and Learning	Master's graduates should be able to acquire a knowledge of the
Outcomes	legal instruments that enable them to deal with the management issues of companies and financial intermediaries, as well as an understanding of the mechanisms of functioning of financial
	markets. These learning outcomes are achieved through an
	advanced knowledge and understanding
	- of the principles of contract law and commercial law to be considered in the management strategies of companies and financial intermediaries;
	- of tax law principles for the definition of the company's tax policy, also in an international perspective;
	- the principles of bankruptcy law for the management of company crises, restructuring and risks;
	- of banking and financial law principles affecting the management of financial institutions and financial investments;
	- the impact of taxation on business decision-making models.
	Applying knowledge and understanding:
	Ability to apply knowledge in the area of Law to assess and decide the legal form of the organisation, also in relation to interactions with its stakeholders
	Ability to apply knowledge in the area of Law to analyse and integrate the legal and fiscal effects in the design and
	implementation of corporate restructuring operations and other extraordinary operations, also in an international context Ability to apply knowledge in the area of law to be able to dialogue
	and interact critically and competently with corporate and tax law professionals
	Making judgements:
	Ability to apply acquired knowledge to make managerial and operational decisions and to solve problems in the administration and finance of companies, intermediaries and financial markets,
	jointly taking into consideration multiple perspectives of analysis, from economic to legal, financial, strategic, managerial
