Course Code	27613
Course Title Additional	
Scientific-Disciplinary Sector	SECS-P/03
Language	English
Degree Course	Master in Public Policy and Innovative Governance
Other Degree Courses (Loaned)	
Lecturers	
Teaching Assistant	
Semester	Second semester
Course Year/s	2
СР	6
Teaching Hours	36 ONLINE
Lab Hours	-
Individual Study Hours	
Planned Office Hours	18 ONLINE
Contents Summary	Economic principles related to energy production, distribution, and consumption, and their relationship with climate change. Policy and regulation for sustainable energy and resource management, including externalities, international agreements, and renewable energy economics. Quantitative analysis using econometric models to measure policy effectiveness and market dynamics in energy and resource markets.
Course Topics	
Keywords	
Recommended Prerequisites	
Propaedeutic Courses	
Teaching Format	

Mandatory Attendance	Attendance is recommended, but not mandatory.
Specific Educational	Knowledge and understanding
Objectives and Learning	
Outcomes	The student will acquire the knowledge of economic theory
	necessary to understand and analyse economic and business
	phenomena in the public sector in order to support decision-
	making processes. Knowledge of public policy and the tools
	necessary for the design of sustainable policies will be
	consolidated. Knowledge related to the labour market, education
	and health will also be deepened, functional to the development of
	public policy analysis and evaluation skills.
	Ability to apply knowledge and understanding
	The student will acquire the ability to:
	- interpret market trends through the application of appropriate
	economic models and implement economic analysis tools, also
	using data;
	- apply economic models to describe the behaviour of economic
	agents and develop sustainable economic policies in various
	application domains of interest to companies and public bodies.
	Autonomy of judgement
	The student will acquire the ability to:
	- apply acquired knowledge to interpret economic and business
	phenomena in order to make managerial and operational decision in the context of public administration;
	- select data and use appropriate information to describe a
	problem concerning the design, implementation and evaluation of
	public sector projects and policies, aiming at innovation and
	improvement of processes, products and results;
	- relate models and empirical evidence in the study of public police
	phenomena;
	- reflect, also in a perspective of public ethics and sustainability
	with regard to future generations, on the responsibilities connecte
	with the use of public resources.
	Communication skills

	The student will acquire the ability to communicate effectively in oral and written form the specialised content of the individual disciplines, using different registers according to recipients and communicative and didactic purposes, and to evaluate the formative effects of his/her communication.
	Learning skills
	The student will acquire the ability to: - use information technology autonomously to carry out
	bibliographic research and investigations and for one's own training and updating;
	- identify thematic links and establish relationships between
	different cases and contexts of analysis;
	- frame a new problem systematically and generate appropriate
	taxonomies;
	- develop general models from the phenomena studied.
