Kursbeschreibung

Titel der Lehrveranstaltung	Modelle für wirtschaftliche, finanzwirtschaftliche und Vermögensprognose (curr. LP)
Code der Lehrveranstaltung	25435
Zusätzlicher Titel der Lehrveranstaltung	
Wissenschaftlich-disziplinärer Bereich	ECON-06/A
Sprache	Italienisch
Studiengang	Master in Accounting und Finanzwirtschaft
Andere Studiengänge (gem. Lehrveranstaltung)	
Dozenten/Dozentinnen	dr. Fabio Ciaponi, Fabio.Ciaponi@unibz.it https://www.unibz.it/en/faculties/economics-management/academic-staff/person/40631
Wissensch. Mitarbeiter/Mitarbeiterin	
Semester	Zweites Semester
Studienjahr/e	2
KP	6
Vorlesungsstunden	36
Laboratoriumsstunden	-
Stunden für individuelles Studium	-
Vorgesehene Sprechzeiten	18
Inhaltsangabe	Making educated decisions today by forecasting operating and financial performance is a critical exercise for owners, managers, consultants, investment bankers, creditors, equity and credit analysts, and investors such as private equity groups, hedge funds, institutional investors and individuals.

	<p>As we are ineluctably constrained by our inability to predict the future, financial projections are rarely perfect. Nonetheless, we endeavor to model several scenarios predicated on historical and anticipated results to derive various conclusions. There are myriad variables, which can certainly be incorporated into projections. However, the best financial model is always the one that is stable and robust, yet simple and easy to build, navigate and audit.</p> <p>The goal of this course is to instruct step-by-step how to build a comprehensive, multi-purpose projection model in Excel and subsequently interpret selective operating, credit and equity valuation data. Based on this information, you will learn how to (i) evaluate a company's operating and financial performance, (ii) develop models for analyzing projected results through the development of simulation techniques, and (iii) assess the quality of investments in a venture capital/private equity setting.</p>

Anwesenheitspflicht	Strongly suggested, but not required
Spezifische Bildungsziele und erwartete Lernergebnisse	<p>Knowledge and understanding:</p> <p>Master's degree graduates should be able to acquire an advanced level of preparation that allows for an in-depth and integrated view of accounting and budgeting and planning and management control issues. These learning outcomes are achieved through an advanced knowledge and understanding</p> <ul style="list-style-type: none"> - of economic-financial communication to stakeholders in national and international contexts; - of economic-business models and performance measurement for planning and management control of internal and external audit

models and methods.

Accounting courses will also enable graduates to acquire skills in specialised subjects that characterise the profession of chartered accountants and auditors."

"Master's graduates should be able to acquire an advanced level of preparation that allows an articulated and integrated view of the finance issues of companies, financial intermediaries, financial institutions and markets. These learning outcomes are achieved through an advanced knowledge and understanding

- of the economic-financial planning and evaluation of new investments;
- of the characteristics associated with extraordinary moments in corporate management, such as capital transactions, recourse to financial markets, mergers and acquisitions, corporate crisis and reorganisation;
- the problems and techniques of the organisation and financial management of companies and financial intermediaries;
- the fundamentals of corporate finance for the correct application of, for example, decision-making models and financial data and risk management to treasury management;
- the management and economic models of the different types of intermediaries, market microstructure, the operational efficiency of financial markets and the impact of financial markets on the economic conditions of intermediaries;
- a wide range of investment, financing and risk management instruments, starting with the fundamentals of portfolio diversification and classical asset pricing and risk measurement models;
- of the specific finance issues that characterise the profession of Financial Analyst, Portfolio Manager, Chief Financial Officer (CFO), Chief Administrative Officer, Controller, Internal Auditor and business consultant."

"Master's graduates should be able to acquire an advanced level of preparation that allows for an articulated and integrated view of business management issues and of economic-quantitative, financial and legal disciplines. These learning outcomes are achieved through an advanced knowledge and understanding

- of the economic-business models and tools for the management of companies, whether family or small or of international dimension;

	<ul style="list-style-type: none">- of the design and management of institutional and organisational structures inherent to corporate governance systems;- of business tools and processes developed to recognise, understand and guide change and manage the impact of a transition on the organisation;- of efficient communication strategies within the organisation and towards the various stakeholders.- of the management issues that characterise the profession of financial analyst, portfolio manager, risk manager and consultant. <p>Applying knowledge and understanding:</p> <p>Ability to apply knowledge in the area of Accounting for the analysis and solution of complex problems in a national and international interdisciplinary context</p> <p>Ability to apply knowledge in the area of Accounting for developing and integrating the results of economic-financial communication into business decision-making models</p> <p>Ability to apply knowledge in the area of Accounting for the design and management of corporate restructuring and other extraordinary transactions</p> <p>Ability to apply knowledge in the area of Accounting in order to be able to dialogue and interact in a competent manner with the managers of the various company functional areas, with financial markets and with corporate and tax law professionals</p> <p>Ability to apply knowledge in the area of Finance to be able to carry out analysis of complex problems in a national and international interdisciplinary context</p> <p>Ability to apply knowledge in the area of Finance for the planning and realisation of corporate restructuring and other extraordinary operations</p> <p>Ability to apply knowledge in the area of Finance for the identification, evaluation and management of investments in financial markets</p> <p>Ability to apply knowledge in the area of Finance for the design of coherent financial management strategies in companies or financial intermediaries, competently applying acquired knowledge in risk management techniques, asset valuation, handling of derivatives</p> <p>Ability to apply knowledge in the area of Management for the critical analysis and formulation of solutions to complex problems in national and international interdisciplinary contexts in small or</p>
