<p><b>Specific Educational Objectives and Learning Outcomes</b></p>	<p><b>EDUCATIONAL OBJECTIVES:</b></p> <p>The course will analyze several methodologies and fields of practice in social education, through targeted literature and by generating processes of reflexivity about social interventions experienced or observed by students themselves. Therefore, the course will provide both a general overview of scientific contents, as well as professional skills and methodologies to craft targeted interventions.</p> <p><b>METHODOLOGY:</b></p> <p>It will be a participative course, with some presentations by the professor, instances of flipped classroom methodology, debates as well as guest teachers and professionals. It will offer a choice of readings and practical tasks for students to self-elaborate and - jointly with peers- construct packages of knowledge that are particularly useful for their preferred fields of practice, while introducing a general overview of key elements for all.</p> <ol style="list-style-type: none"> <li>1. Knowledge and understanding <ul style="list-style-type: none"> <li>- Gain knowledge about theories and concepts that are useful and applicable to social intervention fields.</li> <li>- Appreciate the time, place and context in which such theories were constructed, in order to better evaluate and adapt theories to current field requirements, and critically appraising their constitutional assumptions and premises.</li> <li>- Explore some of the main fields of intervention for social pedagogists.</li> <li>- Gain a toolbox of strategies, methods and instruments that may be applied in such fields.</li> </ul> </li> <li>2. Applying knowledge and understanding <ul style="list-style-type: none"> <li>- Reflect on personal experiences of intervention, participation or observation in social pedagogy contexts</li> <li>- Gain awareness of structural factors influencing individual conditions.</li> <li>- Identify effective methodologies as applied in the context, by recognizing and discussing real or narrated intervention designs.</li> </ul> </li> <li>3. Making judgements <ul style="list-style-type: none"> <li>- Increase the ability to perceive, accept and adapt to diversity.</li> <li>- Learn to identify contextual factors related to the field itself, not reducing wider social questions into individual issues.</li> <li>- Enhance capabilities for boundary- and risk-management in the</li> </ul> </li> </ol>
