Anwesenheitspflicht	
Spezifische Bildungsziele	Knowledge and understanding
und erwartete	The student acquires advanced knowledge and understanding of
Lernergebnisse	the models and instruments of economic-business analysis for the
	creation of a new company with particular attention to the
	identification of new market opportunities, the availability and
	procurement of economic-financial resources and technological and
	organisational skills for the development of the company
	The student acquires advanced knowledge and understanding of
	the models and tools of economic-business analysis for the
	management of a new enterprise, from the financial and
	organisational point of view and with respect to the dynamics of
	growth and development
	I/we acquire advanced knowledge and understanding of the
	theories and tools for the economic analysis of business decisions.
	I/we acquire knowledge and understanding of theories and tools
	for the economic analysis of the market, at the level of the
	individual enterprise and the supply system
	I/we acquire knowledge and understanding of the theories and
	tools of statistical analysis for making market forecasts
	I/we acquire knowledge of the legal forms required for setting up a
	company and for the legal protection of intellectual property rights
	I/we acquire advanced knowledge and understanding of models
	for new product development and innovation management within enterprises
	I/we acquire advanced knowledge and understanding of business
	analysis tools and solutions for the development of innovations and organisational knowledge
	I/we acquire advanced knowledge and understanding of innovation
	economics models and systems for regional innovation
	development
	The student acquires knowledge of quantitative models for the
	formulation of forecasts necessary to guide management decisions
	and to predict the life cycle of a product and a sector
	Ability to apply knowledge and understanding
	ability to acquire and select information that may be relevant from
	an entrepreneurial point of view, also in economic-productive
	contexts different from those studied
	ability to analyse the combination of market opportunities and

resources of the enterprise and to identify entrepreneurial formulas, also with the elaboration of original, compatible and sustainable solutions and combinations

ability to select business economics models, suitable for the appropriate analysis of a specific economic-social and productive context

ability to select the tools for the strategy and management of the enterprise, consistent with the enterprise economy models considered appropriate

ability to assess the potential and sustainability of new business projects (business plan), from a multidisciplinary (economic, business and legal) perspective

ability to assess the entrepreneurial potential associated with the development of an innovation by an enterprise (learning area 2) ability to propose and implement strategic and operational courses of action conducive to the creation of a new enterprise ability to acquire and select relevant information to frame cases of innovation (product, service, social, managerial organisational), also different from the contexts studied

ability to propose and implement strategic and operational lines of action that favour the development of innovation by a company

Autonomy of judgement

Acquire the ability to analyse complex entrepreneurial problems, such as the elaboration and evaluation of an entrepreneurial project (business plan) or the development of a new product. Acquire the ability to make predictions, such as analysing the future consequences of entrepreneurial, managerial and operational choices.

Autonomy of judgement is developed in the training activities carried out for the preparation of the thesis, as well as in the exercises that accompany the lectures and that involve group discussions and the comparison of individual analyses carried out by students in preparation for the lecture.

Communication skills

Acquire the ability to describe and communicate in an intercultural context, in a clear and precise manner, problematic situations typical of the management of a new enterprise and the development of innovation, such as, for example, the conditions

	for the validation of a problem or solution, the prospects and risks associated with a business model or an innovation project. The development of communication competences assumes heterogeneous situations such as, for example, the presence of internal stakeholders (e.g. colleagues, managers, owners), or external stakeholders (e.g. potential investors, suppliers and other business partners) and the ability to sustain an adversarial process. The achievement of these objectives is assessed in the course of the training activities already mentioned, as well as in the discussion of the final thesis.
	Learning ability Acquire the ability to study independently, to prepare summaries. Acquire the ability to identify thematic connections and to establish relationships between different cases and contexts of analysis Acquire the ability to frame a new problem systematically and to generate appropriate taxonomies. Acquire the ability to develop general models from the phenomena studied.
Spezifisches Bildungsziel und erwartete Lernergebnisse (zusätzliche Informationen)	
Art der Prüfung	The assessment takes into consideration the combined acquisition of the learning outcome reached by the students in the two modules. Over the course, students are expected to participate to class discussion based on topic assigned in advance. They are also given written final exam, project works, and oral presentations
Bewertungskriterien	The final grade will be the arithmetic average of the grade in M1 and in M2. A minimum grade of 15 in both modules is required
	For M1 and M2: For attending students: individual written final exam test (at most 70%); course work (at least 30%). For not attending students: final exam 100%
	The final exam will assess the following skills:
	Ability to understand the impact of firms' incentives in designing

	firms' competitive strategy (pricing, entry)
	Ability to understand incentives for firms to collaborate and to
	innovate in environments characterized by complementarities and
	network externalities
	Ability to understand both the private incentives and the welfare
	consequences of firms' strategies
	Ability to assess, within a managerial perspective, costs and
	benefits of innovative activity within a firm, both in the short and in
	the medium-long run
	Ability to identify, from the viewpoint of a manager, the innovation
	protection tools that best fit the different contexts, assessing their
	costs and benefits
	Ability to assess, within a policy-maker perspective, effectiveness
	and efficiency of the various industrial policy instruments for
	innovation.
	Ability to assess the role of institutions (private sector vs public
	sector) in promoting and supporting innovation
	Students are expected both to be able to solve formal economic
	models, and to discuss their implications.

Inhaltsangabe	The course introduces students to some advanced topics in economics of innovation. We will first adopt a microeconomic approach to study how institutions and laws (in particular patents and copyright) affect firms' incentives to innovate, and how the market structure and the level of competition affect R&D. We will then look at the role of institutions in shaping innovative activities. Finally, we will study the economics of platforms and AI – two important sources of innovation nowadays.
Themen der	Introduction to economics of innovation: radical vs

Lehrveranstaltung	incremental innovation and incentives to innovate
	2) Research and development: policies
	3) Research and development: effects
	4) Introduction to history of innovation
	5) Platforms
	6) Networks
	7) Nurturing innovation – inventions, ideas and insti-tutions
	8) Patents and patent policy
	9) Standardization
	10) Asymmetric information and financing innovation
	11) Diffusion of new technologies
	12) Innovation and market dynamics
	13) Artificial intelligence and innovation
	14) Robotization and industrial policy
	15) Innovation in the pharmaceutical sector
Unterrichtsform	Lectures + students' presentations + discussions of cases
