<b>Contents Summary</b>	The module is part of the learning area of the courses characterising the degree and, specifically, in the subject areas of

	<p>History of Pedagogy and Comparative Pedagogy.</p> <p>It comprises two teaching units pertaining to the pedagogical sector (History of Pedagogy and Schooling and Comparative Education) and four laboratories pertaining to the History of Pedagogy subject area.</p> <p>The objectives have been defined in a unified manner in order to construct, as far as possible, a homogeneous and integrated training pathway aimed both at providing students with a mastery of general scientific methods and content and specific professional knowledge.</p> <p>In the course of History of Pedagogy and Schooling - priority will be given to the knowledge of the languages, themes and problems of the historiography of education and the history of education, analysing in a diachronic key the development of pedagogy from the Mediterranean paideia to the contemporary age and the correlation between theories, models, institutions and educational practices.</p> <p>More space will be devoted to the 20th century, from the birth of scientific pedagogy to contemporary pedagogy, with an in-depth study of the various movements and the main interpreters.</p> <p>The course will be further deepened in the course of Comparative Education, in which the aims, the main tools and methods for comparing education and instruction systems, the methodological bases of comparative and educational historical research, as well as the connections with other fields of interest and research will be examined, with a particular focus on a critical investigation of the current processes for the construction of a European educational space, also from the perspective of sharing a common didactic pedagogical vocabulary and homogeneous - albeit contextualised - educational policies.</p>

	<p>The skills and abilities described will be assessed both in itinere (through individual and group activities) and in the final examination.</p>
<b>Specific Educational Objectives and Learning Outcomes (additional info.)</b>	<p>Transversal learning objectives of the module are present in all the individual lessons and workshops and are aimed at promoting the ability to critically analyse texts; apply knowledge; understand the relationship between theory and practice; and be able to contextualise and historicise theories and events.</p>
<b>Assessment</b>	<p>The module provides for the attribution of a single final mark by means of a synthesis of several assessments and a common interdisciplinary oral test, according to the weighted average of the three constituent parts (3 credits for Comparative Education, 3 credits for History of Pedagogy and Educational Institutions and 2 credits for the laboratory). In the event of a negative assessment for the entire module, it is necessary to repeat the exam. However, any successful partial examinations will be considered as already passed in the subsequent attempt to take the entire module examination. It should be borne in mind that, even in this case, a negative assessment of the entire module will count towards the number of attempts available to take an examination. According to the Examinations Regulations, if a student fails an examination in three consecutive attempts, he/she may not sit the same examination in the three sessions following the last attempt (Art. 6(4) of the current Regulations for Proficiency Examinations).</p>
<b>Evaluation Criteria</b>	<p>The final examination takes into account, where foreseen, the intermediate tests and the products of the workshop lectures, which will be assessed by considering: relevance of the content, logical structure, ability to analyse, clarity of argument, lexical appropriateness, originality, ability to rework and reflect in an interdisciplinary key and completeness.</p> <p>The oral test will be a moment of interdisciplinary assessment and supplementary to the intermediate tests.</p>
