

University Academic Curriculum Vitae

Personal information Name: Giovanni Peratoner

Education since leaving school

- 1995: MSc degree on Forestry Sciences. Mark: 110/110 cum laude at the University of Padova (I), Faculty of Agricultural Sciences
- 2003: PhD in Agricultural Sciences (Dr. agr.). Mark: very good (1.0) at the University of Kassel (D), Faculty of Organic Agricultural Sciences, subject: Seed propagation of indigenous species and their use for the restoration of eroded areas in the Alps.

Present appointment

- Technical inspector at the Laimburg Research Centre (South Tyrol, Italy) since May 2005
- Head of the research area Mountain Agriculture (since 2008), group leader Grassland Farming (since 2008) and Arable Crops (2005 to 2014), coordinator of the Laimburg strategic research pillar "Mountain areas/Altitude" (2011-2021), Deputy Director of the Institute for Mountain Agriculture and Food Technology (since 2017)

Professional experience

From / to	Job title	Name of academic Institution	Academic level	responsibilities
03/2004 – 04/2005	Interreg III B CADSES Project SURE (Successful restoration and rehabilitation accompanying infrastructural interventions)	Province of Pordenone (Italy), Agriculture Office (SAASD)	Researcher	Plan, organization, conduction, data analysis and reporting of field experiments
05/1999 – 03/2003	FP04-Projekt ALPEROS (Seed propagation of indigenous species and their use for the restoration of eroded areas in the Alps)	University of Kassel (D), Faculty of Organic Agricultural Sciences, Department Forage Production and Grassland Ecology Position: Activities:	PhD student	Planning, organization, conduction, data analysis and reporting of field and greenhouse experiments
07/1996 – 07/1997	Carbohydrate metabolism in <i>Lolium temulentum</i> at different CO ₂ -levels	Institute for Grassland and Environmental Research, Aberystwyth (Wales, GB), Environmental Biology Department	visiting student with post lauream-grant	Conduction and partial data analysis and reporting of laboratory experiments
11/1994 – 02/1995	Plant communities of high altitudes pastures in the Dolomites	Swiss Federal Research Station for Agriculture Zürich-Reckenholz (CH), Plant Production Department	visiting student with grant	Data analysis and reporting of botanical data previously collected in the field

Experience in academic teaching

- Teaching contract for the module "Forage crops and grassland management - Master in "Smart Sustainable Agriculture Systems in

Mountain Areas" (AGR/02) - Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2025/2026.

- Teaching contract for the module „Grünlandwirtschaft und Ackerbau" (AGR/02) - Bachelor in "Agricultural and Agro-Environmental Sciences" at the Faculty of Agricultural, Environmental and Food Sciences of the Free University of Bozen-Bolzano. Academic year 2024/2025.

- Teaching contract for the module "Grassland management and feed production/Mountain Agriculture" (AGR/03) - Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2023/2024.

- Teaching contract for the module „Grünlandwirtschaft und Ackerbau" (AGR/02) - Bachelor in "Agricultural and Agro-Environmental Sciences" at the Faculty of Agricultural, Environmental and Food Sciences of the Free University of Bozen-Bolzano. Academic year 2023/2024.

- Teaching contract for the module Grassland management and feed production/Mountain Agriculture, AGR/03) within the Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2022/2023.

- Teaching contract for the module Grassland management and feed production/Mountain Agriculture, AGR/03) within the Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2021/2022.

- Teaching contract for the module „Mountain Agriculture (ST-EMMA-LM-73 47044/47044A - Sustainable farming systems in mountain areas /Mountain Agriculture, AGR/03) within the Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2020/2021.

- Teaching contract for the module „Grünlandwirtschaft/Alpicoltura" (ST-AGR-6, AGR/02) within the Bachelor in "Agricultural and Agro-Environmental Sciences" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2018/2019.

- Teaching contract for the module „Grünlandwirtschaft/Alpicoltura" (ST-AGR-6, AGR/02) within the Bachelor in "Agricultural and Agro-Environmental Sciences" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2017/2018.

- Teaching contract for the module „Grünlandwirtschaft/Alpicoltura" (ST-AGR-10, AGR/02) within the Bachelor in "Agricultural and Agro-Environmental Sciences" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2016/2017.

- Teaching contract for the module „Mountain Agriculture/Grassland Management" (ST-EMMA-1, AGR/03) within the Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2016/2017.

- Teaching contract for the module „Mountain Agriculture/Grassland

Pastures" (ST-EMMA-7, AGR/03) within the Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2015/2016.

- Teaching contract for the module „Mountain Agriculture/Grassland Pastures" (ST-EMMA-3, AGR/03) within the Master „Environmental Management in Mountain Areas" at the Faculty of Science and Technology of the Free University of Bozen-Bolzano. Academic year 2014/2015.

Activities relevant to the position (in brackets the number of the activities carried out):

- Supervision or co-supervision of trainees at the Mountain Agriculture Department of the Laimburg Research Centre (23)

- Supervision of degree thesis (15):

- A. Bodner (2013): Factors affecting the crude protein content of first-cut meadow forage in South Tyrol, BSc thesis, Free University of Bozen – Bolzano.

- I. Holzmann (2015): Nutrizione azotata in frumento panificabile: l'effetto della nutrizione organica, MSc thesis, University of Padova.

- L. Vitalone (2016): Effetti quanti-qualitativi dell'azoto organico in frumento panificabile, MSc thesis, University of Padova.

- D. Ortler (2016): Einfluss unterschiedlicher Wirtschaftsdüngergaben auf die Qualität von Winterweizen (*Triticum aestivum* L.), MSc thesis, BOKU Wien.

- K. Urthaler (2016): Modellierung und Validierung des landwirtschaftlichen Ertrages der Grünlandflächen Südtirols, MSc thesis, Leopold Franzens University of Innsbruck.

- E. Depetris (2018): Caratterizzazione varietale di orzo da birra per la coltivazione in aree montane, BSc thesis, Free University of Bozen – Bolzano.

- A. Oberpertinger (2018): Effekt der Ausbringung von Eisensulphat und Kalkstickstoff auf breitblättrige Grünlandkräuter, BSc thesis, BOKU Wien.

- L.E. Zampieri (2018): Analysis of energy use efficiency and nitrogen use efficiency, in a fertilization trial for three cultivars of winter wheat, MSc thesis, WUR Wageningen.

- B. Zwack (2019): Seed bank and short-term effect of organic fertilization on the botanical composition of permanent meadows in South Tyrol. MSc thesis, Free University of Bozen – Bolzano, University of Innsbruck.

- M. Mayr (2019): The effect of management intensity on the competition between lead species in moderately species-rich permanent meadows. BSc thesis, Free University of Bozen.

- M. Morcote Martinez (2019): Stoichiometric responses to single versus multiple recurrent drought in mountain grassland. MSc thesis, Free University of Bozen – Bolzano, University of Innsbruck.

- M. Bonet (2020): Effetti della siccità e dell'intensità gestionale sul bilancio dei nutrienti di prati permanenti. BSc thesis, Free University of Bozen.

- E. Depetris (2022): The effect of management intensity on the botanical composition and nutritional status of moderately species-rich permanent meadows. MSc thesis, Free University of Bozen – Bolzano, University of Innsbruck.

- Staffler T. (2023): Effect of different production systems on concentrate and feed conversion efficiency in South Tyrol: a case study. BSc thesis, Free University of Bozen – Bolzano, University of

Innsbruck.

- Moser M. (2023): Stakeholder perception of species-rich meadows in the Nature Park Trudner Horn (South Tyrol, NE Italy). MSc thesis, Free University of Bozen – Bolzano, University of Innsbruck.

- Organization and conduction of seminars for the determination and analysis of grassland seeds (2) for the students of the Grassland course at the University of Kassel (academic years 2001/2002 and 2002/2003).

- Organization and conduction of field seminars for scholars and students (Oberschule für Landwirtschaft Auer, Fachschule für Landwirtschaft Salern, Fachschule für Landwirtschaft Dietsheim, Bioland, BRING) for the assessment of the botanical composition of permanent meadows and their agronomic evaluation (10)

Memberships

- 2005-2012: member of the expert platform Forage production (Fachgruppe Futterbau) of the Südtiroler Bergbauernberatung.

- since 2010: member of the expert platform Forage production and conservation (Fachgruppe Futterbau und Futterkonservierung) of the Austrian Grassland Federation (ÖAG).

- since 2011: member of the expert platform Seed production and breeding (Saatgutproduktion und Züchtung) of the Austrian Grassland Federation (ÖAG).

- 2010-2016: member of the Italian Interregional network for Agricultural, Forestry, Aquaculture and Fishery Research, Focus Group Agricultural Biodiversity.

- 2010 + 2015: member of the expert jury of the grassland competition "Wiesenmeisterschaft 2010".

- since 2012: member of the directive board of the Italian Society for the study and the enhancement of the alpine livestock systems (SoZooAlp).

- 2014-2015: member of the EIP AGRI Focus Group "Profitability of permanent grassland".

- since 2014: member of the expert platform "Forage production" of BRING (Südtiroler Beratungsring für Berglandwirtschaft).

- since 2016: Accademico Corrispondente to the Sezione Nord Est of the Accademia dei Georgofili.

- 2017- today: member of the working group on fertilisation with animal manure in Natura 2000-areas in South Tyrol.

- 2019-today: member of the working group for the revision of the guidelines for fertilisation in agriculture in South Tyrol to preserve water quality.

- Member of the scientific committee of the 19th Symposium of the European Grassland Federation "Grassland resources for extensive farming systems in marginal lands: major drivers and future scenarios" in Alghero (I) and responsible editor of the session "Alternative and multiple uses of grassland resources" (68 papers).

- Member of the scientific committee of the 20th Meeting of the FAO-CIHEAM Mountain Pastures subnetwork "Adapting Innovation in Grassland Management to Farmers' Needs to Face Social and Climatic Changes", 9-12 September 2018, Lofoten Island (Norway).

- Member of the scientific committee of the joint EAAP-FAO-CIHEAM Meeting held in June 2021 in Bled (Slovenia).

- Member of the scientific committee of the international grazing conference (Internationale Weidetagung) held in June 2022 in Bozen-Bolzano.

- since 2021: Member of the Advisory Board of the European Grassland Federation

In my applied research activities at Laimburg Research Centre, I cover most relevant topics related to grassland farming (in brackets the number of ongoing or concluded projects on the topic during the last 15 years), 8 if them are :

- Yield, forage quality and long-term ecological sustainability of permanent meadows in dependence of grassland management (fertilisation, timing of cut) and meteorological factors (i.e. drought) (4).
- Grassland irrigation (agronomy and digitalisation) (4).
- Development of a cost-saving, user-friendly, web-based, GIS- or sensing-supported tool for the on-line estimation of the potential forage quality of permanent meadows at the first cut based on management, meteorology and botanical factors (webGRAS). Innovative element: exploiting the opportunities of EDP, sensing and GIS to provide farmers with customized, readily implementable information (4).
- Potential of grazing management in the South Tyrolean and European context (4).
- Development of an insurance system against drought damages based on meteorological and/or sensing-based data (3)
- Study of the costs of forage production depending on altitude and steepness of mountain grassland (participatory study in cooperation with local farmers) (2).
- Cultivar testing of relevant grassland forage species (*Festuca arundinacea*, *Dactylis glomerata*, *Trifolium pratense*) (5).
- Optimization and field test of seed mixtures for the establishment of permanent meadows and temporary grassland in mountain environment (7).
- Storage, treatment and application of farmyard manure (1).
- Nutrient balance in grassland and arable crops (participatory study in cooperation with local farmers) (1).
- Prevention and control of grassland weeds (5).

Publications of the last 15 years. Main authors in Italics.

Books – Authored

1. Borreani, G.; Peratoner, G.; Tabacco, E.; Ferrero, F.; Porqueddu, C.; Seddaiu, G. (2025): Foraggicoltura. Bologna: Edagricole.

Books – Edited

2. Porqueddu C., Franca A., Molle G., Lombardi G., Peratoner G., Hopkins A. (eds.) (2017). Grassland resources for extensive farming systems in marginal lands: major drivers and future scenarios. Proceedings of the 19th symposium of the European Grassland Federation, Alghero, Italy 7-10 May 2017, Wageningen Academic Publishers (Grassland Science in Europe, 22), Wageningen. ISBN: 978-88-901771-9-4
